**Jotafloor SF PR 150** 

# **General information**

Product:

Jotafloor SF PR 150, Jotun U.A.E. Ltd. (L.L.C.)

Program operator:

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo Phone: +47 97722020

e-mail: post@epd-norge.no

Declaration number:

NEPD-1962-863-EN

ECO Platform reference number:

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR. Product descriptions and scenarios are based on IBU PCR Part B for coatings with organic binders. This also applies for inorganic coatings.

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

**Declared unit:** 

1 kg Jotafloor SF PR 150, Jotun U.A.E. Ltd. (L.L.C.)

Declared unit with option:

A1,A2,A3

Functional unit:

Verification:

Independent verification of data, other environmental information and the declaration according to ISO14025:2010, § 8.1.3 and § 8.1.4

External

Third party verifier:

Sign

and Konnig

Senior Research Scientist, Anne Rønning

(Independent verifier approved by EPD Norway)

Owner of the declaration:

Jotun A/S

Contact person: Anne Lill Gade Phone: +47 33 45 70 00

e-mail: anne.lill.gade@jotun.no

Manufacturer:

Jotun A/S

Place of production:

Jotun U.A.E. Ltd. (L.L.C.), P.O.Box 3671 Al Quoz Industrial Area, Dubai,

U.A.E.

Management system:

 $ISO\ 9001{:}2008\ Certificate\ nr:\ 0044915{-}00,\ ISO\ 14001{:}2004\ Certificate$ 

nr 0044914-00, OHSAS 18001:2007 Certificate nr: 0044916-00.

Organisation no:

923 248 579

Issue date: 09.12.2019

Valid to: 09.12.2024

Year of study:

2019

Comparability:

EPD of construction products may not be comparable if they not

comply with EN 15804 and seen in a building context.

Author of the Life Cycle Assessment:

The declaration is developed using eEPD v3.0 from LCA.no

Approval:

Company specific data are:

Collected/registered by: Ken Gudvangen

Internal verification by: Anne Lill Gade

Approved:

# **Product**

#### **Product description:**

Jotafloor SF PR 150 is a two component amine cured epoxy coating. It ensures very good adhesion on most concrete floors in atmospheric environments only.

The declared product is a primer for all Jotafloor products. Specially designed for use with the traffic deck system for heavy duty traffic, areas such as ramps, car parks, parking bays, pedestrian walkways, roof decks and industrial floors.

This product when used with Jotafloor Non Slip Aggregates, is suitable for filling and repairing of cracks, undulations and surface imperfections.

### **Product specification**

For information on Green Building Standard credits, see "Additional Information" on page 4.

The material composition of the declared product is given below:

Materials	%
Binder	50-75
Additive	10-25
Solvent	10-25
Filler	5-10

#### **Technical data:**

Product mixing ratio (by volume): Jotafloor SF PR 150 Comp A:3 part(s) Jotafloor SF PR 150 Comp B:1 part(s)

Density comp A: 1.04 g/cm³ Density comp B: 1.02 g/cm³ Solids by volume: 98 ± 2 volume%

Dry film thickness: 150 - 300 um. Wet film thickness: 150 - 300 um. Theoretical spreading rate: 6.7 - 3.3 m²/l.

This EPD applies to a clear coat formulation.

The product packaging is based on an average sized metal packaging, including secondary packaging such as pallets and plastic wrapping.

For safety, health and environmental conditions, see the Safety Data Sheet for the declared product on www.jotun.com.

For information on technical data, application and use of the product, see the Technical Data Sheet for the declared product on www.jotun.com.

#### Market:

Global. Transport to market is not included in this EPD.

### Reference service life, product

The reference service life of the product is highly dependent on the conditions of use.

#### Estimated service life, object

The coated object is not declared.

# LCA: Calculation rules

#### Declared unit:

1 kg Jotafloor SF PR 150, Jotun U.A.E. Ltd. (L.L.C.)

# Cut-off criteria:

All major raw materials and essential energy is included. The production process for raw materials and energy flows with very small amounts (less than 0.1 % dry matter) are not included. In total, more than 99% of the material input is included. These cut-off criteria do not apply for non-energy related emissions (such as wastes, hazardous materials and substances).

#### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy, water and waste production in-house is primarily allocated equally among all products through mass allocation. Specific allocation was performed for certain waste flows according to information provided by the site manager. VOC emissions have been allocated entirely to the production of solvent based paints. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

### Data quality:

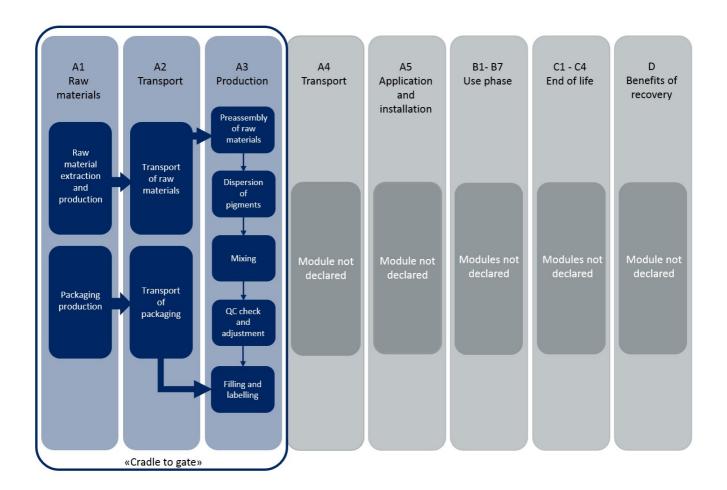

The CEPE database is used as basis for the raw material composition. Specific data for the product composition and raw material amounts has been provided by the manufacturer and represents the production of the declared product. Production site data was collected in 2015. Representative data from ecoinvent v3.2 was used for other processes. The data quality for the material input in A1 is presented in tabular form.

Materials	Source	Data quality	Year
Packaging	Østfoldforskning	Database	2017
Jotafloor SF PR 150 Comp A	Owner of EPD	Database	2019
Jotafloor SF PR 150 Comp B	Owner of EPD	Database	2019

#### System boundary:

The flowchart in the figure below illustrates the system boundaries for the analysis, in accordance with the modular principle of EN 15804. The analysis is a cradle-to-gate (A1 - A3) study.

### Additional information:

The declared product contributes to Green Building Standard credits by meeting the following specific requirements:

#### LEED®v4 (2013)

MR credit: Building product disclosure and optimization

- Material Ingredients, Option 2: Material Ingredient Optimization, International Alternative Compliance Path REACH optimization: Fully inventoried chemical ingredients to 100 ppm and not containing substances on the REACH Authorization list Annex XIV, the Restriction list Annex XVII and the SVHC candidate list.
- Environmental Product Declarations. Product-specific Type III EPD (ISO 14025;21930, EN 15804) for Jotun U.A.E. Ltd. (L.L.C.)

#### **BREEAM International (2016)**

Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804) for Jotun U.A.E. Ltd. (L.L.C.)

### BREEAM International (2013)

Hea 02: VOC content for Two-pack performance coatings SB (500 g/l) (EU Directive 2004/42/CE). Additional certificates and approvals may be available on request.

# LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

This is a cradle to gate (A1-A3) EPD with no declared modules after the factory gate. Transport from place of production to user (A4) has to be calculated by the user.
