

# **ENVIRONMENTAL PRODUCT DECLARATION**

in accordance with ISO 14025, ISO 21930 and EN 15804

Owner of the declaration:	Jotun A/S
Program operator:	The Norwegian EPD Foundation
Publisher:	The Norwegian EPD Foundation
Declaration number:	NEPD-2296-1048-EN
Registration number:	NEPD-2296-1048-EN
ECO Platform reference number:	-
Issue date:	08.07.2020
Valid to:	08.07.2025

# Fenomastic My Home Rich Matt, El-Mohandes Jotun S.A.E.

Jotun A/S

www.epd-norge.no

# **General information**

#### **Product:**

Fenomastic My Home Rich Matt, El-Mohandes Jotun S.A.E.

### **Program operator:**

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo Phone: +47 23 08 80 00 e-mail: post@epd-norge.no

#### Declaration number:

NEPD-2296-1048-EN

#### **ECO Platform reference number:**

#### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR. IBU PCR Part B for coatings with organic binders

#### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

### Declared unit:

1 kg Fenomastic My Home Rich Matt, El-Mohandes Jotun S.A.E.

#### Declared unit with option:

A 1 ,A 2 ,A 3

#### **Functional unit:**

# Verification:

Independent verification of data, other environmental information and the declaration according to ISO14025:2010, § 8.1.3 and § 8.1.4

External

Third party verifier:

Sign

anc Konny

Senior Research Scientist, Anne Rønning

(Independent verifier approved by EPD Norway)

#### Owner of the declaration:

Jotun A/S

Contact person: Anne Lill Gade Phone: +47 33 45 70 00 e-mail: anne.lill.gade@jotun.no

#### Manufacturer:

Jotun A/S

### Place of production:

El-Mohandes Jotun S.A.E. Industrial Area, Ismailia Egypt

#### Management system:

ISO 9001:2008 Certificate nr: 0044915-00, ISO 14001:2004 Certificate nr 0044914-00, ISO 45001: 2018 Certificate nr: 0098139

### **Organisation no:**

923 248 579

### Issue date: 08.07.2020

Valid to: 08.07.2025

### Year of study:

2020

#### Comparability:

 ${\sf EPD}$  of construction products may not be comparable if they not comply with  ${\sf EN}$  15804 and seen in a building context.

#### Author of the Life Cycle Assessment:

The declaration is developed using eEPD v4.0 from LCA.no Approval: Company specific data are:

Collected/registered by: Ken Gudvangen

Internal verification by: Anne Lill Gade

# Approved:

# Product

# Product description:

Fenomastic My Home Rich Matt is a superior quality emulsion paint, with enriched colour experience due to the accuracy of colours and its matt finish. It is based on pure acrylic emulsion and designed for all interior surfaces. This product offers a wider selection of colours which come out more beautifully because of the matt finish. The deep colours look rich, and the strong colours look soft as they are undisturbed by gloss. It also has enhanced film properties.

The declared product has very low VOC which ensures good indoor air quality. It offers good flow, hiding power, incan anti bacterial and colour retention properties. It also provides durable and washable matt finish.

This product is free from harmful chemicals like APEO, formaldehyde. Heavy metals are not used as active ingredients. It is a specially formulated topcoat recommended for all indoor spaces, including residential areas, villas and hotels.

# Product specification

For information on Green Building Standard credits, see "Additional Information" on page 4.

The material composition of the declared mixed product is given below:

Materials	%
Filler	25-50
Water	25-50
Titanium dioxide	10-25
Binder	5-10
Additive	1-3
Solvent	1-3
Biocide	<0.1
Pigment	<0.1

# LCA: Calculation rules

# Declared unit:

1 kg Fenomastic My Home Rich Matt, El-Mohandes Jotun S.A.E.

### Cut-off criteria:

All major raw materials and essential energy is included. The production process for raw materials and energy flows with very small amounts (less than 0.1 % dry matter) are not included. In total, more than 99% of the material input is included. These cut-off criteria do not apply for non-energy related emissions (such as wastes, hazardous materials and substances).

### Technical data:

Specific gravity: 1.59 Solids by volume: 40 ± 2 volume%

Film thickness per coat: Dry film thickness 30 - 55  $\mu m$  Wet film thickness 75 - 135  $\mu m$  Film thickness will vary and is calculated as average.

Theoretical spreading rate 13.3 - 7.3 m<sup>2</sup>/l

The most representative and worst case formulation produced at the manufacturing site is chosen for this EPD. For products with a selection of colours, this will be the formulation with the highest content of titanium dioxide.

The product packaging is based on an average sized metal packaging, including secondary packaging such as pallets and plastic wrapping.

For safety, health and environmental conditions, see the Safety Data Sheet for the declared product on www.jotun.com.

For information on technical data, application and use of the product, see the Technical Data Sheet for the declared product on www.jotun.com.

# Market:

Global. Transport to market is not included in this EPD.

# Reference service life, product

The reference service life of the product is highly dependent on the conditions of use.

# Estimated service life, object

The coated object is not declared.

# Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy, water and waste production in-house is primarily allocated equally among all products through mass allocation. Specific allocation was performed for certain waste flows according to information provided by the site manager. VOC emissions have been allocated entirely to the production of solvent based paints. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

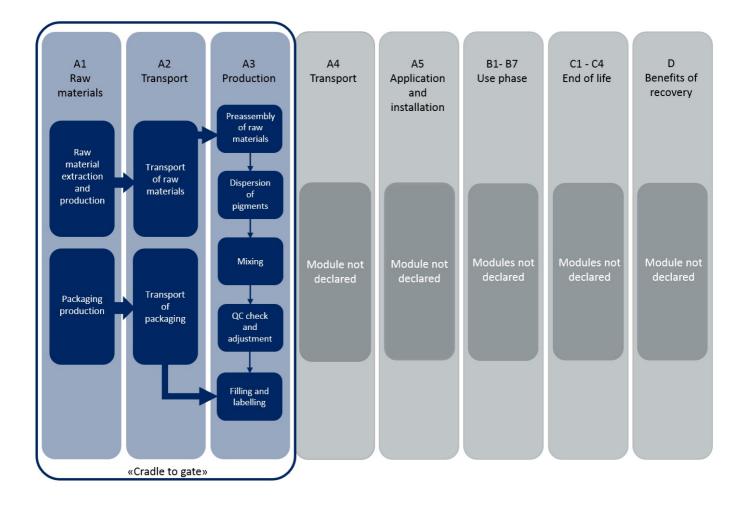

The CEPE database is used as basis for the raw material composition. Specific data for the product composition and raw material amounts has been provided by the manufacturer and represents the production of the declared product. Production site data was collected in 2015. Representative data from ecoinvent v3.2 was used for other processes. The data quality for the material input in A1 is presented in tabular form.

Materials	Source	Data quality	Year
Additives	CEPE RM Database v3.0	Database	2016
Binders and Resins	CEPE RM Database v3.0	Database	2016
Others	CEPE RM Database v3.0	Database	2016
Pigments and Fillers	CEPE RM Database v3.0	Database	2016
Solvents	CEPE RM Database v3.0	Database	2016
Unverified data	No data	No data	2016
Packaging	Østfoldforskning	Database	2017

# System boundary:

The flowchart in the figure below illustrates the system boundaries for the analysis, in accordance with the modular principle of EN 15804. The analysis is a cradle-to-gate (A1 - A3) study.

### Additional information:

The declared product contributes to Green Building Standard credits by meeting the following specific requirements:

LEED®v4 (2013/LEED®v4.1 (2019):

EQ credit: Low-emitting materials

- VOC content for Flat coatings (50 g/l) (CARB(SCM)2007) and emission less or equal to 0.5 mg/m3 (CDPH method 1.2)

 ${\tt MR}$  credit: Building product disclosure and optimization

- Material Ingredients, Option 2: Material Ingredient Optimization, International Alternative Compliance Path - REACH optimization: Fully inventoried chemical ingredients to 100 ppm and not containing substances on the REACH Authorization list – Annex XIV, the Restriction list – Annex XVII and the SVHC candidate list.

- Environmental Product Declarations. Product-specific Type III EPD (ISO 14025;21930, EN 15804) for El-Mohandes Jotun S.A.E. (Egypt).

BREEAM International (2016):

- Hea 02: VOC emission ((ISO 16000-series (2006) or CDPH method 1.2 (2017)) and the VOC content for Interior matt walls and ceilings (10 g/l)

- Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804) for El-Mohandes Jotun S.A.E. (Egypt).

Additional certificates and approvals may be available on request.

# LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD. This is a cradle to gate (A1-A3) EPD with no declared modules after the factory gate. Transport from place of production to user (A4) has to be calculated by the user.
