**ECO** Platform reference number:

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR. IBU PCR Part B for coatings with organic binders

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

**Declared unit:** 

1 kg Jotashield Colourxtreme Matt, El-Mohandes Jotun S.A.E.

Declared unit with option:

A1,A2,A3

Year of study:

2020

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Functional unit:

Author of the Life Cycle Assessment:

The declaration is developed using eEPD v4.0 from LCA.no Approval:

Company specific data are:

# **Product**

## **Product description:**

Jotashield Colourxtreme Matt is a superior quality, exterior, 100% pure acrylic water based topcoat. The unique heat reflective features and UV protected colours offer outstanding protection against heat from infrared (IR) rays and destructive effect of UV rays present in sunlight. This product is specially designed to withstand the harsh middle east weather conditions and provides durable & long lasting matt finish with low dirt pick up.

The declared product is a low-VOC product that contributes to reducing energy consumption in cooling the interiors of buildings. Its unique formulation protects concrete from carbonation (acts as anticarbonation coating). Jotashield Colourxtreme Matt is ideal for decorating and protecting exterior surfaces.

## **Product specification**

For information on Green Building Standard credits, see "Additional Information" on page 4.

The material composition of the declared mixed product is given below:

| Materials        | %     |
|------------------|-------|
| Water            | 50-75 |
| Binder           | 10-25 |
| Filler           | 10-25 |
| Titanium dioxide | 10-25 |
| Pigment          | 1-3   |
| Solvent          | 1-3   |
| Additive         | 0.3-1 |
| Biocide          | <0.1  |

#### Technical data:

TDS Specific gravity: 1.31 SDS Density: 1.26 - 1.367 g/cm<sup>3</sup> Solids by volume: 38 ± 2 volume%

Film thickness per coat: Dry film thickness: 35  $\,$  50  $\mu m$  Wet film thickness: 92  $\,$  132  $\,$   $\mu m$  Theoretical spreading rate: 10.8  $\,$  7.6  $\,$  m²/l

The most representative and worst case formulation produced at the manufacturing site is chosen for this EPD. For products with a selection of colours, this will be the formulation with the highest content of titanium dioxide

The product packaging is based on an average sized metal packaging, including secondary packaging such as pallets and plastic wrapping.

For safety, health and environmental conditions, see the Safety Data Sheet for the declared product on www.jotun.com.

For information on technical data, application and use of the product, see the Technical Data Sheet for the declared product on www.jotun.com.

#### Market:

Global. Transport to market is not included in this EPD.

#### Reference service life, product

The reference service life of the product is highly dependent on the conditions of use.

#### Estimated service life, object

The coated object is not declared.

# LCA: Calculation rules

#### **Declared unit:**

1 kg Jotashield Colourxtreme Matt, El-Mohandes Jotun S.A.E.

## **Cut-off criteria:**

All major raw materials and essential energy is included. The production process for raw materials and energy flows with very small amounts (less than 0.1 % dry matter) are not included. In total, more than 99% of the material input is included. These cut-off criteria do not apply for non-energy related emissions (such as wastes, hazardous materials and substances).

## Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy, water and waste production in-house is primarily allocated equally among all products through mass allocation. Specific allocation was performed for certain waste flows according to information provided by the site manager. VOC emissions have been allocated entirely to the production of solvent based paints. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

## Data quality:

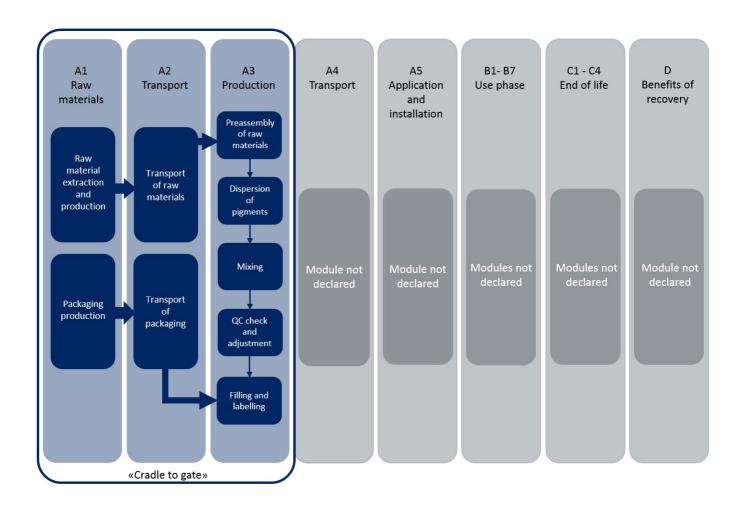

The CEPE database is used as basis for the raw material composition. Specific data for the product composition and raw material amounts has been provided by the manufacturer and represents the production of the declared product. Production site data was collected in 2015. Representative data from ecoinvent v3.2 was used for other processes. The data quality for the material input in A1 is presented in tabular form.

| used for other processes. The data quality for the material input in 741 is presented in abdult form. |                       |              |      |  |  |  |  |

#### System boundary:

The flowchart in the figure below illustrates the system boundaries for the analysis, in accordance with the modular principle of EN 15804. The analysis is a cradle-to-gate (A1 - A3) study.

## Additional information:

The declared product contributes to Green Building Standard credits by meeting the following specific requirements:

## LEED® v4.1 (2019)

EQ credit: Low-emitting materials

- VOC content for Exterior walls and mineral substrate WB (40 g/l) (EU Directive 2004/42/CE) and emission between 0.5-5.0 mg/m3 (CDPH method 1.2).

## LEED ® v4 (2013)/ LEED ® v4.1 (2019)

MR credit: Building product disclosure and optimization

- Material Ingredients, Option 2: Material Ingredient Optimization, International Alternative Compliance Path REACH optimization. The product has fully inventoried chemical ingredients to 100 ppm and do not contain substances on the REACH Authorization list Annex XIV, the Restriction list Annex XVII or the SVHC candidate list.
- Environmental Product Declarations. Product-specific Type III EPD (ISO 14025;21930, EN 15804) for El-Mohandes Jotun S.A.E.

## SS Credit: Heat Island Reduction

- Selected colour(s) of this product meets the requirements of:
- -SR of at least 0.33 for Non-roof structures
- -SRI of at least 39 for Steep-sloped roof
- -SRI of at least 82 for Low-sloped roof
- -SRI of at least 39 for Parking roof covering

# LEED® (2009):

SS Credit 7.1: Heat Island Effect - Nonroof

- Hardscape, Roof structures and Parking roof covering. Selected colour(s) have SRI of at least 29.
- SS Credit 7.2: Heat Island Effect Roof
- Selected colour(s) have SRI of at least 29 for Steep-sloped roof and 78 for Low-sloped roof.

## **BREEAM International (2016)**

- Hea 02: VOC exemplary emission CDPH method 1.2 (2017)) and the VOC content for One-Pack performance coatings (100 g/l).
- Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804) for El-Mohandes Jotun S.A.E.

Additional certificates and approvals may be available on request.

# LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

This is a cradle to gate (A1-A3) EPD with no declared modules after the factory gate. Transport from place of production to user (A4) has to be calculated by the user.

| Туре   | Capacity<br>utilisation (incl.<br>return) % | Type of v | vehicle Distance km                            | Fuel/Energy consumption | Unit     |                 | Value (I/t) |

# **Additional requirements**

## Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix          | Data source             | Amount  | Unit          |
|--------------------------|-------------------------|---------|---------------|
| Electricity, Egypt (kWh) | ecoinvent 3.3 Alloc Rec | 1113,82 | g CO2-ekv/kWh |

## **Dangerous substances**

The product contains no substances given by the REACH Candidate list.

#### Indoor environment

The declared product is emission tested by RISE Research Institutes of Sweden/SP Technical Research Institute of Sweden or Eurofins in accordance with California Department of Public Health (CDPH) Standard Method v1.2–2017.
