Jotafloor Topcoat E, El-Mohandes Jotun S.A.E.

Jotun A/S

www.epd-norge.no

General information

Product:

Jotafloor Topcoat E, El-Mohandes Jotun S.A.E.

Program operator:

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo Phone: +47 23 08 80 00 e-mail: post@epd-norge.no

Declaration number:

NEPD-2530-1271-EN

ECO Platform reference number:

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR. IBU PCR Part B for coatings with organic binders

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

Declared unit:

1 kg Jotafloor Topcoat E, El-Mohandes Jotun S.A.E.

Declared unit with option:

A1,A2,A3

Functional unit:

Verification:

Independent verification of data, other environmental information and the declaration according to ISO14025:2010, § 8.1.3 and § 8.1.4

External

Jotun A/S

Contact person: Anne Lill Gade Phone: +47 33 45 70 00 e-mail: anne.lill.gade@jotun.no

Manufacturer:

Jotun A/S

Place of production:

El-Mohandes Jotun S.A.E. Industrial Area, Ismailia Egypt

Management system:

ISO 9001:2008 Certificate nr: 0044915-00, ISO 14001:2004 Certificate nr 0044914-00, ISO 45001: 2018 Certificate nr: 0098139

Organisation no:

923 248 579

Issue date: 11.11.2020

Valid to: 11.11.2025

Year of study:

2020

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Author of the Life Cycle Assessment:

The declaration is developed using eEPD v4.0 from LCA.no Approval: Company specific data are:

Collected/registered by:

Internal verification by:

Product

Product description:

Jotafloor Topcoat E is a two component amine cured solvent free epoxy coating. It is a high performance product. It is easy to apply. This product is tintable in a wide range of colors in Jotun's Multicolor Industry (MCI) system. It has excellent chemical, abrasion and impact resistance. If enhanced slip resistance is required Jotafloor Non Slip can be used in the system.

The declared product is to be used as topcoat in atmospheric environments and is suitable on approved primers on concrete substrates. It is designed for a wide range of floors with various levels of mechanical and chemical exposure. This product is specially designed for floors where a dust free, hard wearing and aesthetically pleasing coating is required.

Typical use areas are industrial floors, laboratories, hospitals, food and beverage plants, kitchens, high tech manufacturing facilities, dairies, warehouses, factories and hangars.

Product specification

For information on Green Building Standard credits, see "Additional Information" on page 4.

The material composition of the declared mixed product is given below:

| Materials | % |
|------------------|---------|
| Binder | 25-50 |
| Filler | 25-50 |
| Titanium dioxide | 10-25 |
| Solvent | 5-10 |
| Additive | 0.1-0.3 |

Technical data:

Product mixing ratio (by volume): Jotafloor Topcoat E Comp A: 4 part(s) Jotafloor Topcoat E Comp B (40): 1 part(s)

NO PART MIXING. Use a slow speed drill and mixing paddle.

The temperature of base and curing agent is recommended to be 18 $^{\circ}$ C or higher when the paint is mixed.

Density Comp A: 1.496 - 1.604 g/cm³ Density Comp B: 1.02 g/cm³ Solids by volume: 98 ± 2 volume%

Dry film thickness: 100 - 250 um. Wet film thickness: 100 - 255 um. Theoretical spreading rate: 9.8 -3.92 m²/l.

The most representative and worst case formulation produced at the manufacturing site is chosen for this EPD. For products with a selection of colours, this will be the formulation with the highest content of titanium dioxide.

The product packaging is based on an average sized metal packaging, including secondary packaging such as pallets and plastic wrapping.

For safety, health and environmental conditions, see the Safety Data Sheet for the declared product on www.jotun.com.

For information on technical data, application and use of the product, see the Technical Data Sheet for the declared product on www.jotun.com.

Market:

Allocation:

Global. Transport to market is not included in this EPD.

Reference service life, product

The reference service life of the product is highly dependent on the conditions of use.

The allocation is made in accordance with the provisions of EN 15804.

Incoming energy, water and waste production in-house is primarily allocated equally among all products through mass allocation. Specific allocation was

performed for certain waste flows according to information provided by the

solvent based paints. Effects of primary production of recycled materials is

process and transportation of the material is allocated to this analysis.

allocated to the main product in which the material was used. The recycling

site manager. VOC emissions have been allocated entirely to the production of

Estimated service life, object

The coated object is not declared.

LCA: Calculation rules

Declared unit:

1 kg Jotafloor Topcoat E, El-Mohandes Jotun S.A.E.

Cut-off criteria:

All major raw materials and essential energy is included. The production process for raw materials and energy flows with very small amounts (less than 0.1 % dry matter) are not included. In total, more than 99% of the material input is included. These cut-off criteria do not apply for non-energy related emissions (such as wastes, hazardous materials and substances).

Data quality:

The CEPE database is used as basis for the raw material composition. Specific data for the product composition and raw material amounts has been provided by the manufacturer and represents the production of the declared product. Production site data was collected in 2015. Representative data from ecoinvent v3.2 was used for other processes. The data quality for the material input in A1 is presented in tabular form.

| Materials | Source | Data quality | Year |
|--|------------------|--------------|------|
| Packaging | Østfoldforskning | Database | 2017 |
| Jotafloor Topcoat E Comp A, El-Mohandes | Owner of EPD | Database | 2020 |
| Jotafloor Topcoat E Comp B (40), El-Mohandes | Owner of EPD | Database | 2020 |

System boundary:

The flowchart in the figure below illustrates the system boundaries for the analysis, in accordance with the modular principle of EN 15804. The analysis is a cradle-to-gate (A1 - A3) study.

Additional information:

The declared product contributes to Green Building Standard credits by meeting the following specific requirements:

LEED ® v4.1 (2013)/ LEED ® v4.1 (2019)

EQ credit: Low-emitting materials

- VOC content for Floor coatings (100 g/l) (CARB(CSM)2007) and emission between 0.5 and 5.0 mg/m3 (CDPH method 1.2).

MR credit: Building product disclosure and optimization

Material Ingredients, Option 2: Material Ingredient Optimization, International Alternative Compliance Path - REACH optimization: Fully inventoried chemical ingredients to 100 ppm and not containing substances on the REACH Authorization list – Annex XIV, the Restriction list – Annex XVII and the SVHC candidate list.
 Environmental Product Declarations. Product-specific Type III EPD (ISO 14025;21930, EN 15804) for El-Mohandes Jotun S.A.E. (Egypt).

BREEAM International (2016)

Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804) for El-Mohandes Jotun S.A.E. (Egypt).

BREEAM International (2013) Hea 02: VOC content for Two-pack performance coatings SB (500 g/l) (EU Directive 2004/42/CE).

Additional certificates and approvals may be available on request.

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD. This is a cradle to gate (A1-A3) EPD with no declared modules after the factory gate. Transport from place of production to user (A4) has to be calculated by the user.

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix | Data source | Amount | Unit |
|--------------------------|-------------------------|---------|---------------|
| Electricity, Egypt (kWh) | ecoinvent 3.3 Alloc Rec | 1113,82 | g CO2-ekv/kWh |

Dangerous substances

The product contains no substances given by the REACH Candidate list.

Indoor environment

The declared product is emission tested by RISE Research Institutes of Sweden/SP Technical Research Institute of Sweden or Eurofins in accordance with California Department of Public Health (CDPH) Standard Method v1.1–2010.
