Product

Product description:

Flügger 03 Wood Tex Transparent is a semi-matt transparent wood protection for exterior use. It leaves the wood's vein structure visible, and prevents the formation of mould and mould growth on the surface of the wood.

For information on Green Building Standard credits and Ecolabels, see "Additional Information" on page 4.

Product specification:

Life cycle analysis carried out for the white variant, which is estimated to have the greatest environmental impact.

The material composition of the declared product:

Materials	%
Water	40-50
Binder	40-50
Pigment	0-2
Solvent	1.5-3
Additive	1.5-3
Biocide	1-2

Packaging	kg
Wooden packaging - pallet	4,85E-02
Plastic packaging - pallet	1,70E-03
Plastic packaging	5,06E-02

Technical data:

Density: 1,02 kg/l
 Solids by volume: 10,0%
 EU VOC limit value for product (Cat. A/e): 130 g/l
 Product VOC max. 10 g/l

Nominal spreading rate:

Sawn wood: 6-8 m²/l; Planed wood: 8-10 m²/l
 Wet film thickness: 100-150 µm
 Dry film thickness: 10-15 µm

The most representative and worst case formulation is chosen for this EPD. For products with a selection of colours, this will be the formulation with the highest content of titanium dioxide.

The product packaging is based on an average sized plastic packaging and is reported in the A1-phase.

For information on technical data, application and use of the product, see the Technical Data Sheet and FDV (*Forvaltning, Drift og Vedlikehold*) for the declared product on www.flugger.no

For safety, health and environmental conditions, see the Safety Data Sheet for the declared product on www.flugger.no.

Market:

Scandinavia and Europe

Reference service life, product

The reference service life of the product is highly dependent on the conditions of use.

Estimated service life, object

The coated object is not declared.

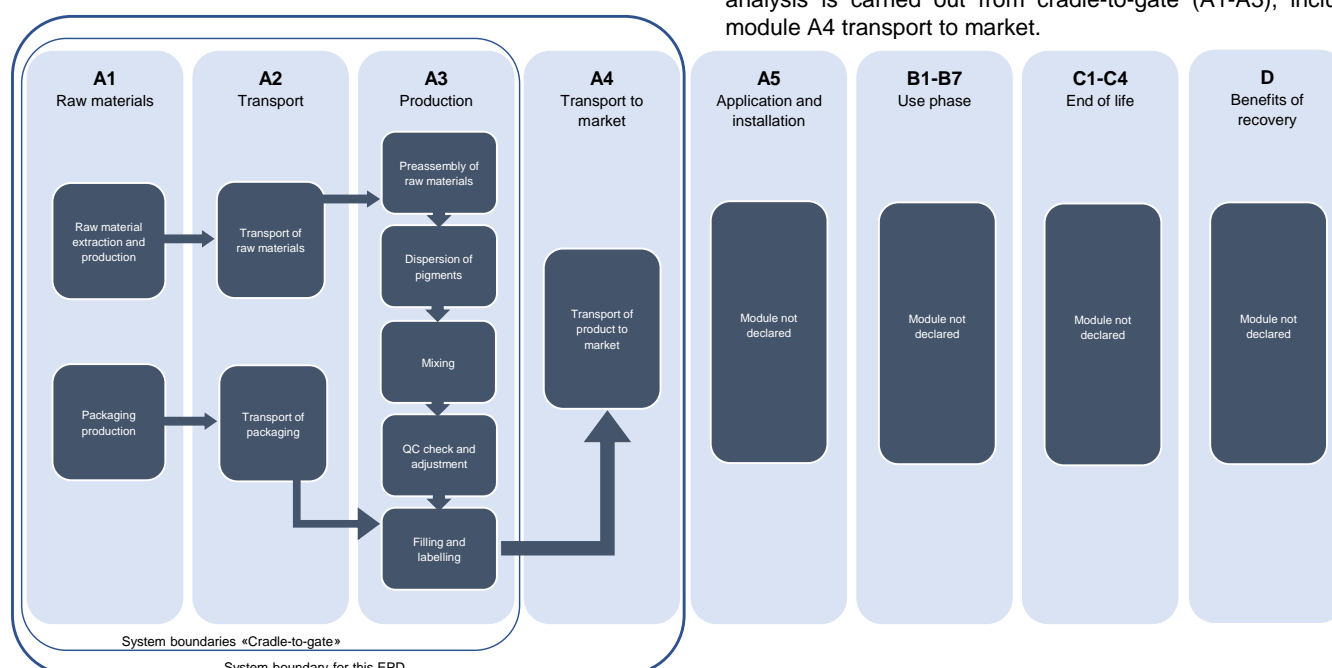

LCA: Calculation rules

Declared unit:

1 kg Flügger 03 Wood Tex Transparent delivered to market

System boundary:

The flow chart below illustrates the system boundaries for the analysis according to the module principle in NS-EN 15804. The analysis is carried out from cradle-to-gate (A1-A3), including module A4 transport to market.

Data quality:

The CEPE database is used as basis for the raw material composition. Specific data for the product composition and raw material amounts has been provided by the manufacturer and represents the production of the declared product. Production site data was collected in 2020 from January 1st to October 31st, and extrapolated to cover the entire year. Remaining data is based on Ecoinvent v3.6, but adjusted to improve representativeness. All energy consumption in the database is assumed not to be used as raw material.

Cut-off criteria:

All major raw materials and essential energy is included. The production process for raw materials and energy flows with very small amounts (<1%), such as consumables in production and administration and employee travel, are not included. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of NS-EN 15804. Incoming energy, water and waste production in-house is primarily allocated equally among all products through volume allocation. The recycling process and transportation of the material is allocated to this analysis.

Additional information:

The declared product contributes to Green Building Standard credits by meeting the following specific requirements:

- Properties criteria in BASTA (2020:A2)
- The product contains no substances on the Norwegian Technical Check List (A20), which exceeds the limit value for health and environment.

Additional certificates and approvals may be available on request.

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

The only declared module after the factory gate is A4 transport to market.

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3). Background data is presented in the table below. Characterisation factors from NS-EN 15804:2012+A1:2013 is used.

Electricity mix	Data source	Value	Unit
Electricity, Denmark (kWh)	ecoinvent 3.6	329	g CO ₂ -eq./kWh

Dangerous substances

- The product contains no substances given by the REACH Candidate list or the Norwegian priority list
- The product contains substances given by the REACH Candidate list <0,1 weight%
- The product contains substances given by the REACH Candidate list or the Norwegian priority list, see table above
- The product contains no substances given by the REACH Candidate list or the Norwegian priority list. The product is characterised as hazardous waste (acc. to the Waste Directive, Appendix III), see table above.

Indoor environment

Not relevant. Product is intended for outdoor use.
