

ENVIRONMENTAL PRODUCT DECLARATION

in accordance with ISO 14025, ISO 21930 and EN 15804

| Owner of the declaration: | Con-Form Group AS |
|--------------------------------|------------------------------|
| Program operator: | The Norwegian EPD Foundation |
| Publisher: | The Norwegian EPD Foundation |
| Declaration number: | NEPD-2953-1645-EN |
| Registration number: | NEPD-2953-1645-EN |
| ECO Platform reference number: | - |
| Issue date: | 05.07.2021 |
| Valid to: | 05.07.2026 |

Plattendekke, forspent (Strömstad)

Con-Form Group AS

www.epd-norge.no

General information

Product:

Plattendekke, forspent (Strömstad)

Program operator:

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo Phone: +47 23 08 80 00 e-mail: post@epd-norge.no

Declaration number:

NEPD-2953-1645-EN

ECO Platform reference number:

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR NPCR 020:2018 Part B for Concrete and concrete elements

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

Declared unit:

1 m2 Plattendekke, forspent (Strömstad)

Declared unit with option:

A1,A2,A3,A4,A5

Functional unit:

1 m2 who are cast completed on site after installation of technical installations

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Individual third party verification of each EPD is not required when the EPD tool is i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPDNorway, and iii) the proccess is reviewed annualy. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools.

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Anne Rønning, Norsus AS

(no signature required)

Owner of the declaration:

Con-Form Group AS Contact person: Magne Aarsland Phone: +47 93239763 e-mail: Magne.Aarsland@con-form.no

Manufacturer:

Con-Form Group AS Østensjøveien 36 0667 OSLO Norway

Place of production:

Con-Form Strömstad AB Norra Båleröd 1 452 94 Strömstad Sweden

Management system:

Con-Forms miljøstyringssystem er basert på ISO 14001

Organisation no:

976 736 311

Issue date: 05.07.2021

Valid to: 05.07.2026

Year of study:

2020

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Development and verification of EPD:

The declaration has been developed and verified using EPD tool lca.tools ver EPD2020.11, developed by LCA.no AS. The EPD tool is integrated into the company's environmental management system, and has been approved by EPD-Norway

Developer of EPD:

Tore Aasen

Reviewer of company-specific input data and EPD:

Urban Holme

Approved:

Sian

Håkon Hauan, CEO EPD-Norge

Product

Product description:

Plattedekke (flooring) with pre-stressed reinforcement, for use in all types of concrete buildings. The elements have high mechanical strength, large capacity and durability against climate stress. Plattendekke is used as a starting point for the compact floor. Technical installations before final casting on site.

Product specification

Plattendekke with concrete B45 M60. 1 m2 Plattendekke contains this percentage distribution of sub-materials:

| Materials | kg | % |
|---------------|--------|-------|
| Cement | 30,56 | 16,25 |
| Aggregate | 133,71 | 71,11 |
| Water | 15,28 | 8,13 |
| Chemicals | 0,81 | 0,43 |
| Reinforcement | 5,66 | 3,01 |
| Steel | 2,02 | 1,07 |
| Total: | 188,05 | |

LCA: Calculation rules

Declared unit:

1 m2 Plattendekke, forspent (Strömstad)

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Technical data:

Plattendekke consists of 50 mm layer. Manufactured according to SSEN 13747, SSEN 13369. Concrete is produced in accordance with the requirements of SS-EN-206.

Weight of this type of Plattendekke is about 188kg / m2.

Market:

South-west of Sweden and eastern part of Norway (Oslo-area)

Reference service life, product

100 year according to normal standard

Reference service life, building

100 year according to normal standard

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

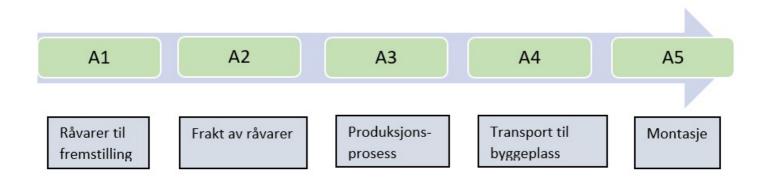

| Materials | Source | Data quality | Year |
|---------------|--------------------------|--------------|------|
| Aggregate | Ecolnvent 3 | Database | 0 |
| Aggregate | Modified EcoInvent | Database | 2012 |
| Reinforcement | Østfoldforskning | Database | 2012 |
| Reinforcement | AENOR EPD 001-001 | EPD | 2015 |
| Chemicals | EPD-EFC-20150091-IAG1-EN | EPD | 2015 |
| Water | ecoinvent 3.4 | Database | 2017 |
| Chemicals | EPD-BAS-20170089-IBC1-EN | EPD | 2017 |
| Steel | EPD-BMG-GB-10.2 | EPD | 2018 |
| Cement | EPD-HCG-20190140-CAA1-EN | EPD | 2019 |

System boundary:

Modules A1-A5 are included in the analysis. It includes all processes from extraction and production of raw materials, transport to the factory, the production process itself. In addition, transport to the construction site (150 km) has been included in accordance with guidelines.

Final casting of concrete is not included in the declaration as the volume of this depends on several project-specific conditions.

Additional technical information:

Con-Form has established and follows its own Quality System / Production Description as a basis for the certification by Nordcerts and an Environmental Management System based on NS-EN 14001

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Transport from production place to user (A4)

| Туре | Capacity utilisation (incl. return) % | Type of vehicle | Distance km | Fuel/Energy consumption | Unit | Value (l/t) |
|----------------------|--|-----------------------------|-------------|----------------------------|-------|-------------|
| Truck | 55,0 % | Lastebil med henger, EURO 6 | 150 | 0,022606 | l/tkm | 3,39 |
| Railway | | | | | l/tkm | |
| Boat | | | | | l/tkm | |
| Other Transportation | | | | | l/tkm | |

Assembly (A5)

| • | Unit | Value |
|---------------------------------------|----------------|--------|
| Auxiliary | kg | |
| Water consumption | m ³ | |
| Electricity consumption | kWh | 0,5425 |
| Other energy carriers | MJ | |
| Material loss | kg | |
| Output materials from waste treatment | kg | 0,1734 |
| Dust in the air | kg | |
| VOC emissions | kg | |

LCA: Results

The LCA results are presented below for the declared unit defined on page 2 of the EPD document.

Additional Norwegian requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix | Data source | Amount | Unit |
|----------------------|-------------------------|--------|---------------|
| El-mix, Sweden (kWh) | ecoinvent 3.4 Alloc Rec | 42,67 | g CO2-ekv/kWh |

Dangerous substances

The product contains no substances given by the REACH Candidate list or the Norwegian priority list.

Indoor environment

No impact on indoor climate
