

## **ENVIRONMENTAL PRODUCT DECLARATION**

in accordance with ISO 14025, ISO 21930 and EN 15804

Owner of the declaration:	Helland Møbler AS
Program operator:	The Norwegian EPD Foundation
Publisher:	The Norwegian EPD Foundation
Declaration number:	NEPD-3179-1820-EN
Registration number:	NEPD-3179-1820-EN
ECO Platform reference number:	-
Issue date:	15.10.2021
Valid to:	15.10.2026

# Sid Stacking chair

## Helland Møbler AS

www.epd-norge.no

## **General information**

#### Product:

Sid Stacking chair

#### Program operator:

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo Phone: +47 23 08 80 00 e-mail: post@epd-norge.no

#### **Declaration number:**

NEPD-3179-1820-EN

#### ECO Platform reference number:

#### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR NPCR 026:2018 Part B for furniture

#### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### Declared unit:

1 Pcs Sid Stacking chair

#### Declared unit with option:

A1,A2,A3,A4

### Functional unit:

Production of one chair provided and maintained for a period of 15 years.

#### General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Individual third party verification of each EPD is not required when the EPD tool is i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPDNorway, and iii) the proccess is reviewed annualy. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools.

#### Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

#### Erik Svanes, Norsus AS

(no signature required)

### Owner of the declaration:

Helland Møbler AS Contact person: Joakim Helland Phone: +47 958 09 013 e-mail: joakim.helland@helland.no

#### Manufacturer:

Helland Møbler AS Postboks 10 6259 Stordal Norway

#### Place of production:

Helland Baltic ÖU Hapvali, Nõmme küla, Haapsalu linn EE-90439 Läänemaa Estonia

#### Management system:

ISO 14001:2015, sertifikat nr 901085

#### **Organisation no:**

943 511 128

#### Issue date: 15.10.2021

Valid to: 15.10.2026

#### Year of study:

2020

### Comparability:

EPDs from programmes other than the Norwegian EPD Foundation may not be comparable

#### Development and verification of EPD:

The declaration has been developed and verified using EPD tool lca.tools ver EPD2020.11, developed by LCA.no AS. The EPD tool is integrated into the company's environmental management system, and has been approved by EPD-Norway

Developer of EPD:

Oddrun Innselset

Reviewer of company-specific input data and EPD:

Pawel Sosinski

### Approved:

Sign

Håkon Hauan, CEO EPD-Norge

Key environmental indicators	Unit	Cradle to gate A1 - A3
Global warming	kg CO2 eqv	33,26
Total energy use	MJ	656,39
Amount of recycled materials	%	36,28

## Product

### Market:

Europa and USA.

### Product description:

SID stacking chair Benefits:

- \* Stackable
- \* Can be connected in series
- \* Armrests allow the chair to be hung on a table top

#### **Product specification**

SID stacking chairs with armrests are delivered with an upholstered seat and back.

Steel in black, gray epoxy (RAL9006) or chrome

### Technical data:

Width: 52 cm, Height: 83 cm, Depth: 54 cm, Sitting height: 46 cm, Armrest height: 67 cm, Seat depth: 43 cm, Weight: 8kg

#### Reference service life, product

15 years.

#### Reference service life, building

Total including packaging	11,71		4,25	

## LCA: Calculation rules

#### Declared unit:

1 Pcs Sid Stacking chair

#### Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

#### Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

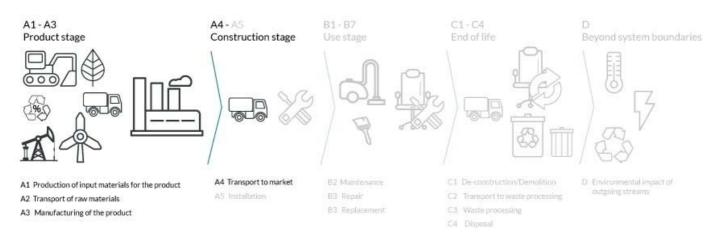

Materials	Source	Data quality	Year
Plastic - Polypropylene (PP)	ecoinvent 3.4	Database	2015
Plastic - Polyurethane (PUR)	ecoinvent 3.4	Database	2015
Metal - Steel	ecoinvent 3.3	Database	2016
Packaging - Cardboard	ecoinvent 3.4	Database	2017
Textile - Polyester (PE)	ecoinvent 3.4	Database	2017
Wood - Plywood	ecoinvent 3.4	Database	2017
Powder coating	ecoinvent 3.5	Database	2018

### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

#### System boundary:

#### Additional technical information:

Transportation to an average customer in Copenhagen is 1000 km (A4: average European lorry > 32 tonnes) The use stage (B1) is represented by a scenario and includes vacuum cleaning of textile once a month. The PCR does not provide detailed guidelines for what should be included in the use stage. In the end of life stage, the transport distance for waste to waste processing is 72 km (C1). The reuse, recovery and recycling stage is beyond the system boundaries (D). It is assumed that the solution is dismantled and the materials recycled or combusted according to general Norwegian treatment of industrial waste (see the table below). This calculation includes only CO2 emissions (GWP) in the C-modules. The transport distance to reuse, recovery or recycling varies for each material, but the average distance is 373 km. The vehicles used and associated data are described in detail in [5].

## LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Transportation to an average customer in Copenhagen is 1000 km (A4: average European lorry > 32 tonnes) The use stage (B1) is represented by a scenario and includes vacuum cleaning of textile once a month. The PCR does not provide detailed guidelines for what should be included in the use stage. In the end of life stage, the transport distance for waste to waste processing is 72 km (C1). The reuse, recovery and recycling stage is beyond the system boundaries (D). It is assumed that the solution is dismantled and the materials recycled or combusted according to general Norwegian treatment of industrial waste (see the table below). This calculation includes only CO2 emissions (GWP) in the C-modules. The transport distance to reuse, recovery or recycling varies for each material, but the average distance is 373 km. The vehicles used and associated data are described in detail in [5].

#### Transport from production place to user (A4)

Туре	Capacity utilisation (incl. return) %	Type of vehicle	Distance km	Fuel/Energy consumption	Unit	Value (l/t)
Truck	38,8 %	Truck, 16-32 tonnes, EURO 5	937	0,044606	l/tkm	41,80
Railway					l/tkm	
Boat					l/tkm

# HELLAND®

## **Additional Norwegian requirements**

#### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

#### Dangerous substances

The product contains no substances given by the REACH Candidate list or the Norwegian priority list.

#### Indoor environment

Our Furniture does not contain any substances that affects indoor climate.
