### **General information**

**Product:** 

weber prepakt injekt CEM II

Program operator:

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo Phone: +47 23 08 80 00 e-mail: post@epd-norge.no

**Declaration number:** 

NEPD-3720-2664-EN

**ECO Platform reference number:** 

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR.

NPCR 009:2018 Part B for Technical - Chemical products in the building and construction industry

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

**Declared unit:** 

1 kg weber prepakt injekt CEM II

Declared unit with option:

A1,A2,A3,A4,A5,C1,C2,C3,C4,D

Functional unit:

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Individual third party verification of each EPD is not required when the EPD tool is i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPDNorway, and iii) the process is reviewed annualy. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools.

**Verification of EPD tool:** 

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Anne Rønning, Norsus AS

Owner of the declaration:

Saint-Gobain Sweden AB, Weber Contact person: Anders Anderberg Phone: +46 8 625 6105

 $e\hbox{-}mail: anders. anderberg @weber.se$ 

Manufacturer:

Saint-Gobain Sweden AB, Weber

Place of production:

Saint-Gobain Sweden AB, Weber Box 415 SE-19162 Sollentuna Sweden

Management system:

ISO 9001, ISO 14001

Organisation no:

SE-556241-2592

**Issue date:** 16.09.2022

Valid to: 16.09.2027

Year of study:

2021

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Development and verification of EPD:

The declaration has been developed and verified using EPD tool lca.tools ver EPD2020.11, developed by LCA.no AS. The EPD tool is integrated into the company's environmental management system, and has been approved by EPD-Norway

Developer of EPD:

Thomas Flycht

Reviewer of company-specific input data and EPD:

Helene Wallgren

Håkon Hauan, CEO EPD-Norge

### **Product**

#### **Product description:**

Prepakt injekt CEM II is a very fluid injection grout for bonding ballast beds of different types of materials such as crushed aggregate, recycled crushed concrete or demolition materials suitable for casting.

#### **Product specification**

The composition of the product is described in the following table:

| Materials | %     |
|-----------|-------|
| Aggregate | 50-75 |
| Binder    | 10-25 |
| Filler    | 5-25  |
| Additives | <5    |

#### **Technical data:**

For information, see www.se.weber

#### Market:

Nordic and Baltic countries

#### Reference service life, product

The reference service life of the product is similar to the service life of the building.

#### Reference service life, building

50 years

#### LCA: Calculation rules

#### **Declared unit:**

1 kg weber prepakt injekt CEM II

#### **Cut-off criteria:**

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

#### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

#### Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

| Materials | Source                 | Data quality | Year |
|-----------|------------------------|--------------|------|
| Aggregate | ecoinvent 3.4          | Database     | 2017 |
| Filler    | ecoinvent 3.4          | Database     | 2017 |
| Packaging | ecoinvent 3.4          | Database     | 2017 |
| Packaging | Modified ecoinvent 3.4 | Database     | 2017 |
| Binder    | Supplier               | EPD          | 2021 |

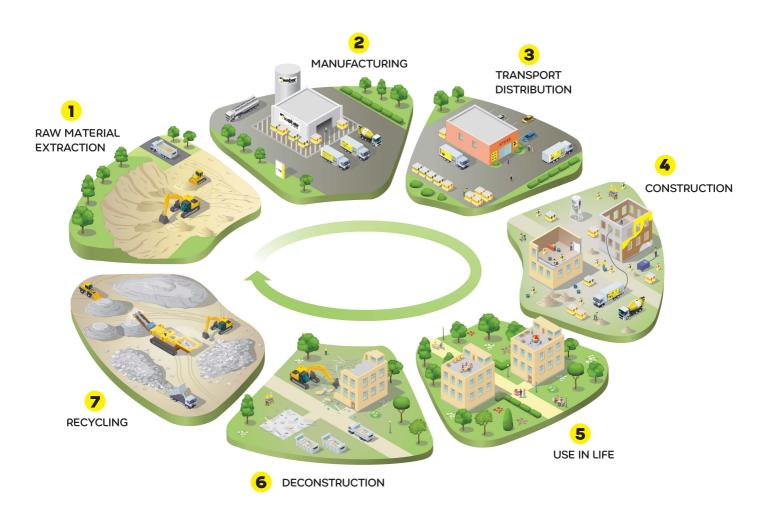

#### System boundary:

All processes from raw material extraction to product transport to the construction site and assembly are included in the analysis as well as end of life stage and phases beyond the system boundary (A1 - A5, C1-C4, D). The basic production process comprises of mixing of raw materials together. Ready mixed product is then packed into small bags for delivery.

product is then packed into small bags for delivery.

Prepakt injekt doesn't require any maintenance during the use stage, so stage B is not considered. When building is demolished at the end-of-life, the concrete are crushed. 90 % of the crushed concrete is recycled and used to replace aggregates in concrete, remaining 10% being disposed into landfill. System boundaries (cradle-to-gate with options) are illustrated in the picture below

#### Additional technical information:

The remaining powder is classified as hazardous waste. Cured material is inactive and not classified as hazardous waste and may be disposed as construction waste to disposal or recycling.

The packaging properly emptied is not classified as hazardous waste.

# LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Transport to market (A4) is calculated based on the default distance of 300 km from NPCR 009.

#### Transport from production place to user (A4)

| Туре                 | Capacity utilisation (incl. return) % Type of vehicle |                                     | Distance km | Fuel/Energy<br>consumption | Unit  | Value (I/t) |

CR Components for reuse; MR Materials for recycling; MER Materials for energy recovery; EEE Exported electric energy; ETE Exported thermal energy

"Reading example: 9,0 E-03 = 9,0\*10-3 = 0,009"

\*INA Indicator Not Assessed

# **Additional Norwegian requirements**

#### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix                                               | Data source            | Amount | Unit          |
|---------------------------------------------------------------|------------------------|--------|---------------|
| Renewable electricity with Guarantee of Origin from LOS (kWh) | Modified ecoinvent 3.4 | 60,20  | g CO2-ekv/kWh |

#### **Dangerous substances**

The product contains no substances given by the REACH Candidate list or the Norwegian priority list. The product is classified as hazardous waste (Avfallsforskriften, Annex III), see table.

| Name            | CASNo      | Amount |
|-----------------|------------|--------|
| Portland Cement | 65997-15-1 | 10-25% |

#### Indoor environment

The product has no impact on the indoor environment.
