Penguard EXPRESS UHS

General information

Product:

Penguard Express UHS, Jotun U.A.E. Ltd. (L.L.C.), Dubai

Program operator:

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo Phone: +47 23 08 80 00 e-mail: post@epd-norge.no

Declaration number:

NEPD-3733-2682-EN

ECO Platform reference number:

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR. IBU PCR Part B for coatings with organic binders

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

Declared unit:

1 kg Penguard Express UHS, Jotun U.A.E. Ltd. (L.L.C.), Dubai

Declared unit with option:

A1,A2,A3

Functional unit:

Verification:

Independent verification of data, other environmental information and the declaration according to ISO14025:2010, § 8.1.3 and § 8.1.4

External

Third party verifier:

Sian

and Ronnig

Senior Research Scientist, Anne Rønning

(Independent verifier approved by EPD Norway)

Owner of the declaration:

Jotun A/S Contact person: Cleo Alves Otterbech Phone: +47 33 45 70 00 e-mail: cleo.otterbech@jotun.no

Manufacturer:

Jotun U.A.E. Ltd. (L.L.C.)

Place of production:

Jotun U.A.E. Ltd. (L.L.C.) Near Old National Taxi depot, Street 17A, Al Quoz Industrial Area 2 Dubai United Arab Emirates

Management system:

ISO 9001:2008 Certificate nr: 0044915-00, ISO 14001:2004 Certificate nr 0044914-00, ISO 45001: 2018 Certificate nr: 0098139

Organisation no:

923 248 579

Issue date: 22.09.2022

Valid to: 22.09.2027

Year of study:

2022

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Author of the Life Cycle Assessment:

The declaration is developed using EPD tool lca.tools ver EPD2020.11, developed by LCA.no AS Approval:

Collected/registered by:
Internal verification by:

Ken Gudvangen

Cleo Alves Otterbech

Approved:

Product

Product description:

Penguard Express UHS is a two component polyamine cured epoxy coating. It is a fast drying, micaceous iron oxide (MIO) pigmented, high solids, high-build coating specially designed for new construction and fabrication yards where short dry-to-handle and overcoating times are critical.

The declared product is surface tolerant and suitable for use as a maintenance coating where abrasive blast cleaning is not possible and quick turn around is required. It can be used as primer or mid-coat in a suitable coating system or as a finish coat or single coat system in atmospheric environments where chalking is not a concern.

Penguard Express UHS is suitable for structural steel and piping to be exposed to highly corrosive environments, C5 (ISO 12944-2). Recommended for onshore environments, refineries, power plants, bridges, buildings and mining equipment.

Product specification

For information on Green Building Standard credits, see "Additional Information" on page 4.

The material composition of the declared mixed product is given below:

Materials	%
Binder	25 - 50
Filler	25 - 50
Solvent	5 - 10
Additive	3 - 5
Pigment	3 - 5

Technical data:

Mixing mixing ratio (by volume) Penguard Express UHS Comp A: 3 part(s) Penguard Express UHS Comp B: 1 part(s)

Density: 1.45 g/cm³ Solids by volume: 85 ± 2 volume%

Film thickness per coat: Dry film thickness: 75 - 250 µm Wet film thickness: 90 - 295 µm

Theoretical spreading rate: 11.3 - 3.4 m²/l

The most representative and worst case formulation produced at the manufacturing site is chosen for this EPD. For products with a selection of colours, this will be the formulation with the highest content of titanium dioxide.

The product packaging is based on an average sized metal packaging, including secondary packaging such as pallets and plastic wrapping.

For safety, health and environmental conditions, see the Safety Data Sheet for the declared product on www.jotun.com.

For information on technical data, application and use of the product, see the Technical Data Sheet for the declared product on www.jotun.com.

Market:

Global. Transport to market is not included in this EPD.

Reference service life, product

The reference service life of the product is highly dependent on the conditions of use.

Estimated service life, object

The coated object is not declared.

LCA: Calculation rules

Declared unit:

1 kg Penguard Express UHS, Jotun U.A.E. Ltd. (L.L.C.), Dubai

Cut-off criteria:

All major raw materials and essential energy is included. The production process for raw materials and energy flows with very small amounts (less than 0.1 % dry matter) are not included. In total, more than 99% of the material input is included. These cut-off criteria do not apply for non-energy related emissions (such as wastes, hazardous materials and substances).

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy, water and waste production in-house is primarily allocated equally among all products through mass allocation. Specific allocation was performed for certain waste flows according to information provided by the site manager. VOC emissions have been allocated entirely to the production of solvent based paints. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

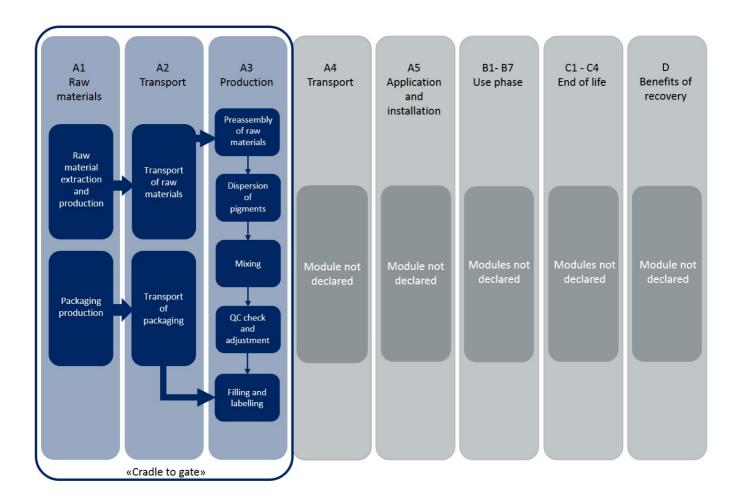

The CEPE database is used as basis for the raw material composition. Specific data for the product composition and raw material amounts has been provided by the manufacturer and represents the production of the declared product. Production site data was collected in 2015. Representative data from ecoinvent v3.2 was used for other processes. The data quality for the material input in A1 is presented in tabular form.

Materials	Source	Data quality	Year
Packaging	Østfoldforskning	Database	2017
Penguard Express UHS Comp A, Dubai	Owner of EPD	Database	2022
Penguard Express UHS Comp B, Dubai	Owner of EPD	Database	2022

System boundary:

The flowchart in the figure below illustrates the system boundaries for the analysis, in accordance with the modular principle on EN 15804. The analysis is a cradle-to-gate (A1-A3) study.

Additional information:

The declared product contributes to Green Building Standard credits by meeting the following specific requirements:

LEED[®] v4 (2013)

EQ credit: Low emitting materials, Healthcare and schools:

- Exterior applied products: VOC content for Industrial Maintenance Coatings (250 g/l) (CARB(SCM)2007).

LEED ® v4 (2013)/LEED ® v4.1 (2020)

MR credit: Building product disclosure and optimization

- Environmental Product Declarations: Product-specific Type III EPD (ISO 14025;21930, EN 15804) for Jotun U.A.E. Ltd. (L.L.C.), Dubai.

BREEAM® International (2016)/BREEAM® International (2021) - Mat 01: Product-specific Type III EPD (ISO 14025;21930, EN 15804) for Jotun U.A.E. Ltd. (L.L.C.), Dubai.

Additional certificates and approvals may be available on request.

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD. This is a cradle to gate (A1-A3) EPD with no declared modules after the factory gate. Transport from place of production to user (A4) has to be calculated by the user.

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Data source	Amount	Unit
Electricity, United Arab Emirates (kWh)	ecoinvent 3.3 Alloc Rec	1113,82	g CO2-ekv/kWh

Dangerous substances

The product contains dangerous substances, more than 0,1% by weight, given by the REACH Candidate list, see table.

Name	CASNo	Amount
Ethylenediamine	107-15-3	0.85%

Indoor environment

Not applicable for externally applied products.
