

# Environmental product declaration

In accordance with 14025 and EN15804+A2

NOIK-AL-S 90 4X240

The Norwegian EPD Foundation

Owner of the declaration:

NKT A/S

Product:

NOIK-AL-S 90 4X240

**Declared unit:** 

1 m

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core

NPCR 027 Part B for Electrical cables and wires

**Program operator:** 

The Norwegian EPD Foundation

**Declaration number:** 

NEPD-4494-3754-EN

**Registration number:**NEPD-4494-3754-EN

Issue date: 26.05.2023

**Valid to:** 26.05.2028

**EPD Software:** 

LCA.no EPD generator ID: 56566

# **General information**

## **Product**

NOIK-AL-S 90 4X240

#### **Program operator:**

Post Box 5250 Majorstuen, 0303 Oslo, Norway The Norwegian EPD Foundation Phone: +47 23 08 80 00 web: post@epd-norge.no

#### **Declaration number:**

NEPD-4494-3754-EN

## This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR 027 Part B for Electrical cables and wires

## Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### Declared unit:

1 m NOIK-AL-S 90 4X240

#### **Declared unit with option:**

A1,A2,A3,A4,A5,B1,B2,B3,B4,B5,B6,B7,C1,C2,C3,C4,D

#### **Functional unit:**

1 m of NOIK-AL-S 90 4X240 installed electrical cable used to transmit a reference electric current of 1A over 40 years, including waste treatment at end-of-life.

## General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Individualthird party verification of each EPD is not required when the EPD tool is i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPDNorway, and iii)the process is reviewed annualy. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools.

#### **Verification of EPD tool:**

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools. Approval number: NEPDT32.

Third party verifier:

Owner of the declaration:

NKT A/S

Contact person: Matheo Roehr

Phone:

e-mail: matheo.roehr@nkt.com

Manufacturer:

NKT A/S Vibeholms Allé 20 2605 Brøndby, Denmark

#### Place of production:

NKT production site Kladno (Czech Republic Prumyslová 1130 27201 Kladno, Czech Republic

# **Management system:**

ISO 9001, ISO 14001

## Organisation no:

957 338 690

**Issue date: 26.05.2023** 

Valid to: 26.05.2028

## Year of study:

2021

# **Comparability:**

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

## **Development and verification of EPD:**

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway. Approval number:

Developer of EPD: Ann Aittamaa

Reviewer of company-specific input data and EPD: Matheo Roehr

Approved:

Håkon Hauan

Managing Director of EPD-Norway

Vito D'Incognito - Take Care International (no signature required)

## **Product**

## **Product description:**

Suitable for being laid in the ground and onto cable trays. Where halogen-free and environmentally friendly cables are required. Conductor insulation must be protected against direct light exposure. Installation to be performed by a licensed electrician only. NOIK-AL-S 90 is registered in the Building Materials Database and can be included in a Nordic Swan Ecolabelled building.

#### **Product specification**

Conductor: Aluminum, stranded, sector-shaped

Insulation: PEX insulation Wrapping: Crepe

Thermoplastic compound, UV-stabilized

Materials	kg	%
Fillers	0,05	1,47
Plastic - Polyethylene	0,48	13,10
HFFR Polyolefin	0,60	16,36
Metal - Aluminium	2,55	69,07
Total	3,69	

#### **Technical data:**

NOIK®-AL-S 90

Standards applied: NKT factory standard no. 008 35-300 mm2: HD 604-5F, IEC 60502-1

Rated voltage: 0,6/1 kV Test voltage: 4 kV AC Operating temperature: 90 °C

Conductor temperature: 90 °C
Max. short-circuit temperature: 250 °C
Min. handling temperature: -5 °C
Max. storage temperature: 40 °C
Color of sheath: Light grey
Fire test: IEC 60332-1

CPR fire class: Eca

Min. bending radius: 10 x cable diameter Max. pulling force: 30 N/mm2 on conductors

Fulfill Low Voltage Directive

## Market:

Denmark

# Reference service life, product

40 years. As defined in appendix 1 of the PEP Ecopassport PSR.

#### Reference service life, building or construction works

40 years.

# LCA: Calculation rules

#### **Declared unit:**

1 m NOIK-AL-S 90 4X240

## **Cut-off criteria:**

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

#### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

## Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

Materials	Source	Data quality	Year
Fillers	ecoinvent 3.6	Database	2019
HFFR Polyolefin	ecoinvent 3.6	Database	2019
Metal - Aluminium	ecoinvent 3.6	Database	2019
Plastic - Polyethylene	ecoinvent 3.6	Database	2019

#### LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Module A4 = An average distance between the factory and the market is considered.

Modules A5 = 2 % product losses during installation are estimated by the company. No energy use for installation has been quantified since this operation is assumed to be done with other products and should be assessed at a construction works level. Cable drums are reused and assumed under the cut-off criterion of 1%.

Modules B1, B2, B3, B4, B5, and B7 = Company data shows that no significant activities have been reported for use, maintenance, repair, replacement, refurbishment, and water use. This reflects an absence of impacts during the reference service life of the cable in these modules.

Module B6 = The operational energy use of the cable is calculated based on the methodology described in PEP Ecopassport, Product Specific Rules (PSR) for wires, cables and accessories, reference PSR-0001-ed3-EN-2015 10 16. The following parameters are used to calculate the electricity loss of the cable:

- Reference service life = 40 years (according to appendix 1 of the PSR)
- Number of conductors = 4 unit
- Use rate = 100 % percent (according to appendix 1 of the PSR)
- Linear conductor resistivity = 0.000125 Ohm per meter
- Current intensity = 1 Ampere

Module C1 = For both buildings and construction works, cables will be taken out as part of a larger demolition. The energy use for cable removal compared to other heavier materials is assumed to be low. This module can therefore be included with zero impact.

Module C2 = An average distance between the market and the waste treatment facility is considered.

Modules C3 and C4 = Waste treatment of the product follows the default values provided in EN 50693, Product Category Rules for life cycle assessments of electronic and electrical products and systems, table G.4. This table specified how different types of raw materials used in A1 will likely be treated during the end-of-life of the product. Waste treatments in C3 include material recycling and incineration with and without energy recovery and fly ash extraction. Disposal in C4 consist of landfilling of different waste fractions and of ashes.

Module D = The recyclability of metals and plastics allows the producers a credit for the net scrap that is produced at the end of a product's life. The benefits from recycling of net scrap are described in formula from EN 15804:2012+A2:2019. Substitution of heat and electricity generated by the incineration with energy recovery of plastic insulation and other parts is also calculated in module D.

Transport from production place to user (A4)	Capacity utilisation (incl. return) %	Distance (km)	Fuel/Energy Consumption	Unit	Value (Liter/tonne)
Truck, over 32 tonnes, EURO 6 (km) - Europe	53,3 %	1210	0,023	l/tkm	27,83
Assembly (A5)	Unit	Value			
Product loss during installation (percentage of cable)	Units/DU	0,02			
Operational energy (B6)	Unit	Value			
Electricity, Denmark (kWh)	kWh/DU	0,18			
Transport to waste processing (C2)	Capacity utilisation (incl. return) %	Distance (km)	Fuel/Energy Consumption	Unit	Value (Liter/tonne)
Truck, over 32 tonnes, EURO 6 (km) - Europe	53,3 %	300	0,023	l/tkm	6,90
Waste processing (C3)	Unit	Value			
Aluminium to recycling (kg)	kg	1,78			
Waste treatment of non-hazardous waste, incineration with fly ash extraction (kg)	kg	0,05			
Waste treatment of plastic mixture, incineration with energy recovery and fly ash extraction (kg)	kg	0,30			
Waste treatment of polyethylene (PE), incineration with energy recovery and fly ash extraction (kg)	kg	0,24			
Disposal (C4)	Unit	Value			
Landfilling of aluminium (kg)	kg	0,76			
Landfilling of ashes from incineration of Non- hazardous waste, process per kg ashes and residues (kg)	kg	0,01			
Landfilling of ashes from incineration of Plastic mixture, process per kg ashes and residues (kg)	kg	0,01			
Landfilling of ashes from incineration of Polyethylene (PE), process per kg ashes and residues (kg)	kg	0,01			
Landfilling of plastic mixture (kg)	kg	0,54			

Benefits and loads beyond the system boundaries (D)	Unit	Value		
Substitution of electricity, in Norway (MJ)	MJ	0,93		
Substitution of primary aluminium with net scrap (kg)	kg	1,42		
Substitution of thermal energy, district heating, in Norway (MJ)	МЈ	14,10		

**LCA: Results** 

The LCA results are presented below for the declared unit defined on page 2 of the EPD document.

<sup>\*</sup>INA Indicator Not Assessed

<sup>1.</sup> The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

<sup>2.</sup> This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

# **Additional Norwegian requirements**

# Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Data source	Amount	Unit
Electricity, renewable with guarantee of origin, low voltage, Denmark (kWh) - NKT	ecoinvent 3.6	15,89	g CO2-eq/kWh

## **Dangerous substances**

The product contains no substances given by the REACH Candidate list or the Norwegian priority list.

#### **Indoor environment**

# **Additional Environmental Information**
