#### **Functional unit:**

Production of one Origo table, provided and maintained for a period of 15 years.

#### General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

#### **Verification of EPD tool:**

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

#### **Product**

## **Product description:**

Origo 1200 x 600 mm rectangular table with 724 mm fixed height legs and HPL table top. Sound absorbing acoustic base, castors, micro castors and adjustable foot are available as options.

Origo is a complete range of tables with a focus on ergonomics, acoustics and flexibility to support physical work and study spaces. The tables are available in different heights and a variety of shapes, all with adjustable legs to offer high and low seating. Create a coordinated look and a flexible space with rectangular, square, round, triangular and trapezoidal tables in several sizes. By varying the sizes and shapes of the tables, it's easy to reconfigure them in different ways to support the activity in question.

#### **Product specification**

Origo offers two tabletop options with good acoustic properties: the HPL Acoustic tabletop has a hardwearing surface of high-pressure laminate and effectively dampens noise from hard objects and marmoleum gives a warm, pleasant surface with excellent sound-dampening properties. An optional sound absorber is also available for underneath the table to further improve the acoustics in the room.

Origo can be ordered with innovative micro castors, which are integrated in the leg and make it easy to move the tables and position them next to one another. It's also possible to add connectors. For tables that need to be moved longer distances or over thresholds, there are also larger castors.

## LCA: Calculation rules

#### **Declared unit:**

1 pcs Origo table

#### **Cut-off criteria:**

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

#### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

#### Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below. Specific data for the manufacturing processes (product stage A3) refers to the year 2020. All other specific data is from year of study.

#### System boundary:

Certain steel components are manufactured at Kinnarps' production site in Jönköping and some have been purchased as finished components. The table top is manufactured at Kinnarps' production site in Kinnarp, where the final assembly of the product is also done.

The flow chart below illustrates the system boundaries of the analysis.

#### LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

The product is shipped to the consumer in Kinnarps' trucks with blankets and cardboard sheets as packaging material which is returned to the factory after delivery and reused. This method saves 270 kg of packaging material per container and enables 50% more products to be transported in each truck. Kinnarps' trucks have a load efficiency of approximately 87 % and are run on diesel with renewable content. For more information about sustainability at Kinnarps, visit https://www.kinnarps.com/about-kinnarps/sustainability/

The maintenance scenario includes wet-wiping once a week for the whole reference service life.

In normal use, no repair or replacement is required during the product's referenced service life.

<sup>1.</sup> The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

<sup>2.</sup> This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Biogenic carbon content in accompanying packaging	kg C	4,34E-02							

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

## **Additional requirements**

## Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Data source	Amount	Unit
Electricity, Sweden (kWh)	ecoinvent 3.6	54,94	g CO2-eq/kWh

#### **Dangerous substances**

The product contains substances given by the REACH Candidate list that are less than 0,1 % by weight.

#### **Indoor environment**

The product is low-emitting and tested according to Swedish Möbelfakta.

## **Additional Environmental Information**

## **Key Environmental Indicators**

Key environmental indicators	Unit	A1-A3	A4	A1-C4	A1-D
GWPtotal	kg CO <sub>2</sub> -eq	43,97	0,28	66,08	61,65
Total energy consumption	MJ	1226,24	6,14	1245,36	1143,01

GWPIOBC	kg CO <sub>2</sub> -eq	0	0	1,76E-01	2,86E+00	9,90E-02	-6,27E+00

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
