Declaration number:

NEPD-6977-6366-EN

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR IBU PCR Part B for coatings with organic binders

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

Declared unit:

1 kg CARBOGUARD 890

Declared unit with option:

A1,A2,A3,A4,C1,C2,C3,C4,D

Functional unit:

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Elisabet Amat, GREENIZE projects

(no signature required)

Owner of the declaration:

Carboline Norge AS
Contact person: Malgorzata Tarka-Ruda

Phone: +47 32 85 73 00

e-mail: EPD.Norway@carboline.com

Manufacturer:

Carboline Norge AS

Place of production:

Carboline Norge AS Husebysletta 7 3414 Lierstranda, Norway

Management system:

ISO 9001:2015 and ISO 14001:2015

Organisation no:

980 488 683

Issue date:

28.06.2024

Valid to:

28.06.2029

Year of study:

2022

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Developer of EPD: Anders Øverby

Reviewer of company-specific input data and EPD: Malgorzata Tarka

Approved:

Håkon Hauan

Managing Director of EPD-Norway

Product

Product description:

Highly chemical resistant epoxy mastic coating with exceptionally versatile uses in all industrial markets. Self-priming and suitable for application over most existing coatings, and tightly adherent rust. Serves as stand-alone system for a variety of chemical environments and is also designed for various immersion conditions. An optional micaceous iron oxide additive (MIO Filler) can be purchased separately and may be used per the Product Data Sheet to enhance corrosion protection and film strength for more aggressive service such as severe marine or heavy industrial uses.

- · Excellent chemical resistance
- · Surface tolerant characteristics
- · Conventional and low-temperature versions
- Self-priming and primer/finish capabilities
- · Very good abrasion resistance
- VOC compliant to current AIM regulations
- Suitable for use in USDA inspected facilities
- Intermediate coat for AWWA D102 Outside System #6 and #7
- Approved MPI #98

Product specification

| Materials | Value | Unit |
|------------------|----------|------|
| Binder | 25 - 50 | % |
| Fillers | 25 - 50 | % |
| Solvents | 10 - 25 | % |
| Pigments | 2,5 - 10 | % |
| Titanium Dioxide | 1 - 2,5 | % |
| Additives | < 1 | % |
| Packaging | < 1 | % |

Technical data:

Finish: Gloss

Primer: Self-priming.4 - 6 mils (102 - 152 microns) per coat

Dry Film Thickness: 6.0-8.0 mils (150-200 microns) over light rust and for uniform gloss over inorganic zincs. Don't exceed 10 mils (250 microns) in a single coat. Excessive film thickness over inorganic zincs may increase damage during shipping or erection.

Solids Content: By Volume 75% +/- 2%

Theoretical Coverage Rate:

- 1203 ft²/gal at 1.0 mils (29.5 m²/l at 25 microns)
- 301 ft²/gal at 4.0 mils (7.4 m²/l at 100 microns)
- 200 ft²/gal at 6.0 mils (4.9 m²/l at 150 microns)

VOC Values:

As Supplied: 1.81 lbs/gal (217 g/l)

Thinner 2 : 13 oz/gal (106.8 mg/ml) = 2.30 lbs/gal (276 g/l) Thinner 33 : 16 oz/gal (131.5 mg/ml) = 2.43 lbs/gal (291 g/l) Thinner 33 : 7 oz/gal (57.5 mg/ml) = 2.08 lbs/gal (250 g/l) Thinner 2 : 7 oz/gal (57.5 mg/ml) = 2.08 lbs/gal (250 g/l)

Mixing ratio: 1:1 (by volume)

Pot life: 3 hours at 75°F (24°C)

Market:

Europe

Reference service life, product

The reference service life of the product is highly dependent on the condition of use.

Reference service life, building or construction works

The coated object is not declared in this EPD.

LCA: Calculation rules

Declared unit:

1 kg CARBOGUARD 890

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

Additional technical information:

For more information please refer to Product Data Sheet and Safety Data Sheet.

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

This EPD is prepared for declaring the production process (A1-A3) of 1 kg of packed 'ready-to-use' product. Transport to the client (A4) and end life stage (C modules) and potential environmental benefits (D module) are also included.

Module A4 describes an average distance from the manufacturing site to where the product is being sold to the client.

This declaration covers end-of-life stage (C module) of a coated construction where dried/cured paint is not removed from the surface during demolition.

Module C1 is declared as zero due to the negligible consumption of energy and natural resources for disassembling, since paint is a part of another product that ends its life.

Module C2 is estimated for delivery of paint residues to the closest waste treatment facility and is assumed as 50 km.

Module C3 has a zero impact since dried paint is not recycled or reused.

Module C4 is declared for dried paint, after solvents' evaporation.

Module D is declared for zero since drier or cured paint is non-recyclable nor reusable.

| Transport from production place to user (A4) | Capacity utilisation (incl. return) % | Distance (km) | Fuel/Energy Consumption | Unit | Value (Liter/tonne) |
|--|--|---------------|-------------------------|-------|------------------------|
| Truck, over 32 tonnes, EURO 6 (kgkm) | 53,3 % | 300 | 0,023 | l/tkm | 6,90 |
| De-construction demolition (C1) | Unit | Value | | | |
| Energy use during decommissioning | kWh/DU | 0,00 | | | |
| Transport to waste processing (C2) | Capacity utilisation (incl. return) % | Distance (km) | Fuel/Energy Consumption | Unit | Value (Liter/tonne) |
| Truck, over 32 tonnes, EURO 6 (kgkm) | 53,3 % | 50 | 0,023 | l/tkm | 1,15 |
| Waste processing (C3) | Unit | Value | | | |
| Waste treatment per kg Paint, municipal incineration (kg) | kg/DU | 0,00 | | | |
| Disposal (C4) | Unit | Value | | | |
| Waste, paint, to landfill (kg) | kg/DU | 0,86 | | | |
| Benefits and loads beyond the system boundaries (D) | Unit | Value | | | |
| Substitution of raw materials (kg) | kg/DU | 0,00 | | | |

LCA: Results

The LCA results are presented below for the declared unit defined on page 2 of the EPD document.

^{1.} The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the

^{2.} This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

| kg C | 0,00E+00 | | | | | | | | | |
| kg C | 0,00E+00 | | | | | | | | | |
| | kg C | | | | | | | | | |

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix | Source | Amount | Unit |
|---------------------------|---------------|--------|--------------|
| Electricity, Norway (kWh) | ecoinvent 3.6 | 24,33 | g CO2-eq/kWh |

Dangerous substances

The product contains no substances given by the REACH Candidate list.

Indoor environment

Not relevant.

Additional Environmental Information

| Additional enviro | Additional environmental impact indicators required in NPCR Part A for construction products | | | | | | | | | | | |
|--|--|----------|----------|----------|----------|----------|----------|----------|----------|----------|--|--|
| Indicator Unit A1 A2 A3 A4 C1 C2 C3 C4 D | | | | | | | | | | D | | |
| GWPIOBC | kg CO ₂ -eq | 2,85E+00 | 2,48E-01 | 7,04E-02 | 3,05E-02 | 0,00E+00 | 5,08E-03 | 0,00E+00 | 1,01E-01 | 0,00E+00 | | |

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
