General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Elisabet Amat, GREENIZE projects

Product

Product description:

Easy chair, always ready to use. ITO Design studio has created a chair that at the same time fits into a modern office, conference rooms but is also suitable for hybrid work. It will work well for home office, home schooling, or colleges, taking care of user's spine. TrilloPro is modern and slender in form. It's also easy and quick to assemble with the small number of components.

Product specification

The model studied in detail in this declaration is the Profim TrilloPro 20HST upholstered seat in Xtreme fabric from Camira and plastic back - including carton box packaging. The key environmental indicators for the other models and options of the Profim TrilloPro are presented on a table page 12 of this declaration.

Technical data:

Backrest:

• Plastic backrest available in version entirely plastic or with upholstered cover.

• Backrest pad - cut foam with a density of 35 kg/m3.

• Fixed.

Seat:

• Plastic frame molded molded with polyurethane foam with a density of 70 kg/m3.

Gas lift:

• with additional cushion for a better sitting comfort (version ST).

Mechanism:

• Synchronous mechanism Self (self-weigh) with the possibility of locking in two positions (basic and maximum reclined).

• ST version - with height adjustment function.

Base:

• 5-star base, polyamide (version ST) or 4-star, aluminium (version HST).

Option:

· Castors hard or soft, with a brake. Option: teflon glides, black or lightgrey.

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

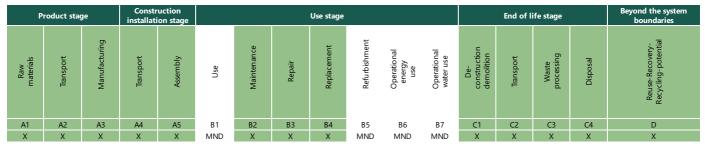

Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

1. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

2. This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
