

# Environmental product declaration

in accordance with ISO 14025 and EN 15804+A2

# U12-32 - Korg Park bench

# nola

The Norwegian EPD Foundation

**Owner of the declaration:** Nola Industrier Aktiebolag

**Product:** U12-32 - Korg Park bench

**Declared unit:** 1 pcs

This declaration is based on Product Category Rules: CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR 026:2022 Part B for Furniture **Program operator:** The Norwegian EPD Foundation

**Declaration number:** 

NEPD-7921-7584-EN

**Registration number:** 

NEPD-7921-7584-EN

Issue date: 24.10.2024

Valid to: 24.10.2029

**EPD software:** LCAno EPD generator ID: 618212

# **General information**

Product U12-32 - Korg Park bench

### Program operator:

The Norwegian EPD Foundation Post Box 5250 Majorstuen, 0303 Oslo, Norway Phone: +47 977 22 020 web: www.epd-norge.no

### Declaration number:

NEPD-7921-7584-EN

# This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR 026:2022 Part B for Furniture

# Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

# Declared unit:

1 pcs U12-32 - Korg Park bench

# Declared unit (cradle to gate) with option:

A1-A3,A4,A5,B2,B3,B4,C1,C2,C3,C4,D

# Functional unit:

1 Korg Park bench, from the Korg furniture series, as delivered to the final customer.

### General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

# Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Elisabet Amat, GREENIZE projects

(no signature required)

### Owner of the declaration:

Nola Industrier Aktiebolag Contact person: Anders Åkesson Phone: 08-702 19 60 e-mail: anders.akesson@nola.se

Manufacturer: Nola Industrier Aktiebolag

# Place of production:

Nola Industrier Aktiebolag Blekingegatan 26 118 56 Stockholm, Sweden

Management system:

**Organisation no:** 556207-4442

### Issue date:

24.10.2024

Valid to: 24.10.2029

### Year of study:

2022

### **Comparability:**

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

### Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Developer of EPD: Joachim Henriksson

Reviewer of company-specific input data and EPD: Anders Åkesson

Approved:

Håkon Hauan, CEO EPD-Norge

# Product

### **Product description:**

Korg park bench is part of the Korg furniture group. Korg is a neat, expressive wire furniture for outdoor use, anchored in a cylindrical base. The thread's thin, vertical lines and checkered seat interact with each other and create a clear graphic expression. At the same time, the function of the material makes it easy for water to drain off. The sofa can also be assembled into several parts and variations, see Korg building system.

### **Product specification**

U12-32 - Korg Park bench Width: 130 cm Height: 88 cm Sitting height: 45 cm Depth: 61 cm

### Technical data:

#### Market:

Global.

#### **Reference service life, product**

15 years.

Reference service life, building

# **LCA: Calculation rules**

### Declared unit:

1 pcs U12-32 - Korg Park bench

#### Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances. Energy flows and materials representing less than 1% of the total are excluded. Cut-off does not apply for REACH materials.

#### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis. Allocation as per EN 15804.

Impacts from primary production of virgin material are assigned to respective component production and includes transportation.

Impacts from repair and replacement are not included in the use stage, as the materials used in the product are designed to last longer than the stated lifespan

Impacts from primary production of recycled materials are assigned to respective component production, and includes recycling and transportation processes.

Emissions from disposal of the product are included and allocated per material. Energy recovery from incineration of relevant materials is included and allocated on a national level.

### Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below. Data has been gathered from sub suppliers and public, current, published EPDs or ecoinvent 3.6 database.

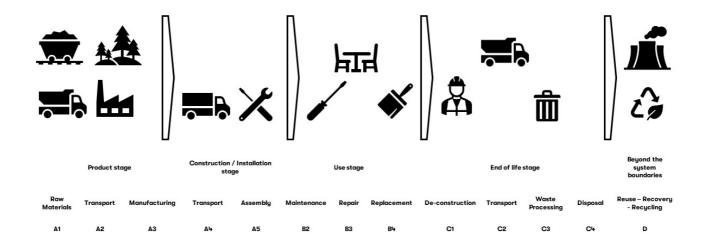

| Materials               | Source                 | Data quality | Year |
|-------------------------|------------------------|--------------|------|
| Metal - Stainless steel | ecoinvent 3.6          | Database     | 2019 |
| Metal - Steel           | ecoinvent 3.6          | Database     | 2019 |
| Packaging - Cardboard   | Modified ecoinvent 3.6 | Database     | 2019 |
| Packaging - Pallet      | ecoinvent 3.6          | Database     | 2019 |
| Packaging - Plastic     | ecoinvent 3.6          | Database     | 2019 |
| Powder coating          | Ecoinvent 3.6          | Database     | 2019 |
| Zinc                    | ecoinvent 3.6          | Database     | 2019 |

# LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Production scenario assumes production in Sweden at sub-suppliers with transport of materials and components between certain production steps.

Usage scenario assumes no repair or replacement and minimal maintenance during the 15 year lifespan of the product, as materials and surface treatments are selected to require servicing during lifetime of product. The installation location is assumed to be within Sweden.

| Transport from production place to user (A4)  | Capacity utilisation<br>(incl. return) % | Distance (km) | Fuel/Energy Consumption | Unit  | Value<br>(Liter/tonne) |

PM = Particulate Matter emissions; IRP = Ionizing radiation - human health; ETP-fw = Eco toxicity - freshwater; HTP-c = Human toxicity - cancer effects; HTP-nc = Human toxicity - non cancer effects; SQP = Soil Quality (dimensionless)

"Reading example: 9,0 E-03 = 9,0\*10-3 = 0,009" \*INA Indicator Not Assessed

1. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

2. This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Biogenic Carbon Content

| Indicator   | Unit | At the factory gate |
|---|------|---------------------|
| Biogenic carbon content in product                | kg C | 0,00E+00            |
| Biogenic carbon content in accompanying packaging | kg C | 8,13E+00            |

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

# **Additional requirements**

### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix           | Source        | Amount | Unit         |
|---------------------------|---------------|--------|--------------|
| Electricity, Sweden (kWh) | ecoinvent 3.6 | 54,94  | g CO2-eq/kWh |

### Dangerous substances

The product contains no substances given by the REACH Candidate list.

#### Indoor environment

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
