

Environmental product declaration

in accordance with ISO 14025 and EN 15804+A2

NAYY-J 4x300 SM

The Norwegian EPD Foundation

Owner of the declaration:

NKT A/S

Product:

NAYY-J 4x300 SM

Declared unit:

1 m

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core

PCR

NPCR 027:2020 Part B for Electrical cables and wires

Program operator:

The Norwegian EPD Foundation

Declaration number:

NEPD-8485-8154-EN

Registration number:

NEPD-8485-8154-EN

Issue date: 13.12.2024

Valid to: 13.12.2029

EPD software:

LCAno EPD generator ID: 135411

General information

Product

NAYY-J 4x300 SM

Program operator:

The Norwegian EPD Foundation
Post Box 5250 Majorstuen, 0303 Oslo, Norway

Phone: +47 977 22 020 web: www.epd-norge.no

Declaration number:

NFPD-8485-8154-FN

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR NPCR 027:2020 Part B for Electrical cables and wires

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

Declared unit:

1 m NAYY-J 4x300 SM

Declared unit with option:

A1,A2,A3,A4,A5,B1,B2,B3,B4,B5,B6,B7,C1,C2,C3,C4,D

Functional unit:

1 m of NAYY-J 4x300 SM installed electrical cable used to transmit a reference electric current of 1A over 40 years, including waste treatment at end-of-life.

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools. Approval number: NEPDT32.

Third party verifier:

Vito D'Incognito, Take Care International

(no signature required)

Owner of the declaration:

NKT A/S

Contact person: Matheo Roehr

Phone:

e-mail: matheo.roehr@nkt.com

Manufacturer:

NKT s.r.o. Prumyslova 1130

CZ-272 01 Kladno, Czech Republic

Place of production:

NKT production site Kladno (Czech Republic) Prumyslová 1130 CZ-272 01 Kladno, Czech Republic

Management system:

ISO 9001, ISO 14001, ISO 45001

Organisation no:

957 338 690

Issue date:

13.12.2024

Valid to:

13.12.2029

Year of study:

2021

Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway. Approval number: NEPDT32

Developer of EPD: Marek Kincl

Reviewer of company-specific input data and EPD: Matheo Roehr

Approved:

Håkon Hauan

Managing Director of EPD-Norway

Product

Product description:

For fixed installation, indoors and outdoors, in the ground and in concrete.

Installation of the product should only be carried out by personnel trained and qualified for electrical works. The product is designed according to recognized standards. Applicable rules of installation must be applied at all times.

Product specification

- 1. Aluminium conductor
- 2. PVC insulation
- 3. Beddina
- 4. PVC sheath

| Materials | kg | % |
|------------------------------------|------|--------|
| Fillers | 0,85 | 13,55 |
| Plastic - Polyvinyl chloride (PVC) | 2,25 | 35,79 |
| Tape | 0,00 | 0,01 |
| Metal - Aluminium | 3,18 | 50,65 |
| Total | 6,29 | 100,00 |

Technical data:

Norm (standard): VDE 0276-603 3G-2

Rated voltage Uo/U: 0,6/1 kV Test voltage: 4 (AC) kV

Maximal short-circuit temperature: 160 (=300 mm2); 140 (>300 mm2) °C

Maximal operating conductor temperature: 70 $^{\circ}$ C Temperature range: from -35 up to +70 $^{\circ}$ C

Minimal temperature for laying and manipulation: -5 °C

Minimal storage temperature: -35 °C Colour of insulation: HD 308 S2

Colour of sheath: black

Self-extinguishing of one cable: CSN EN 60332-1-2; IEC 60332-1; VDE 0482 T332-1-2

CPR-Classification (reaction on fire): Eca

UV stability: Yes Packaging: drum Certificate: EZÚ; VDE

RoHS: Yes REACH: Yes CE Conformity: Yes LVD Conformity: Yes

Market:

Germany

Reference service life, product

40 years. As defined in appendix 1 of the PEP Ecopassport PSR.

Reference service life, building or construction works

40 years.

LCA: Calculation rules

Declared unit:

1 m NAYY-J 4x300 SM

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

| Materials | Source | Data quality | Year |
|------------------------------------|---------------|--------------|------|
| Fillers | ecoinvent 3.6 | Database | 2019 |
| Metal - Aluminium | ecoinvent 3.6 | Database | 2019 |
| Plastic - Polyvinyl chloride (PVC) | ecoinvent 3.6 | Database | 2019 |
| Tape | ecoinvent 3.6 | Database | 2019 |

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Module A4 = An average distance between the factory and the market is considered.

Modules A5 = 2 % product losses during installation are estimated by the company. No energy use for installation has been quantified since this operation is assumed to be done with other products and should be assessed at a construction works level. Cable drums are reused and assumed under the cut-off criterion of 1%.

Modules B1, B2, B3, B4, B5, and B7 = Company data shows that no significant activities have been reported for use, maintenance, repair, replacement, refurbishment, and water use. This reflects an absence of impacts during the reference service life of the cable in these modules.

Module B6 = The operational energy use of the cable is calculated based on the methodology described in PEP Ecopassport, Product Specific Rules (PSR) for wires, cables and accessories, reference PSR-0001-ed3-EN-2015 10 16. The following parameters are used to calculate the electricity loss of the cable:

- Reference service life = 40 years (according to appendix 1 of the PSR)
- Number of conductors = 4 units
- Use rate = 100 % percent (according to appendix 1 of the PSR)
- Linear conductor resistivity = 0,0001 Ohm per meter
- Current intensity = 1 Ampere

Module C1 = For both buildings and construction works, cables will be taken out as part of a larger demolition. The energy use for cable removal compared to other heavier materials is assumed to be low. This module can therefore be included with zero impact.

Module C2 = An average distance between the market and the waste treatment facility is considered.

Modules C3 and C4 = Waste treatment of the product follows the default values provided in EN 50693, Product Category Rules for life cycle assessments of electronic and electrical products and systems, table G.4. This table specified how different types of raw materials used in A1 will likely be treated during the end-of-life of the product. Waste treatments in C3 include material recycling and incineration with and without energy recovery and fly ash extraction. Disposal in C4 consist of landfilling of different waste fractions and of ashes.

Module D = The recyclability of metals and plastics allows the producers a credit for the net scrap that is produced at the end of a product's life. The benefits from recycling of net scrap are described in formula from EN 15804:2012+A2:2019. Substitution of heat and electricity generated by the incineration with energy recovery of plastic insulation and other parts is also calculated in module D.

| Transport from production place to user (A4) | Capacity utilisation (incl. return) % | Distance (km) | Fuel/Energy Consumption | Unit | Value (Liter/tonne) |
|---|--|---------------|-------------------------|-------|------------------------|
| Truck, 16-32 tonnes, EURO 6 (km) - Europe | 36,7 % | 600 | 0,043 | l/tkm | 25,80 |
| Assembly (A5) | Unit | Value | | | |
| Product loss during installation (percentage of cable) | Units/DU | 0,02 | | | |
| Operational energy (B6) | Unit | Value | | | |
| Electricity, Germany (kWh) | kWh | 0,14 | | | |
| Transport to waste processing (C2) | Capacity utilisation (incl. return) % | Distance (km) | Fuel/Energy Consumption | Unit | Value (Liter/tonne) |
| Truck, 16-32 tonnes, EURO 6 (km) - Europe | 36,7 % | 300 | 0,043 | l/tkm | 12,90 |
| Waste processing (C3) | Unit | Value | | | |
| Waste treatment of plastic mixture, incineration with energy recovery and fly ash extraction (kg) | kg | 0,00 | | | |
| Waste treatment of non-hazardous waste, incineration with fly ash extraction (kg) | kg | 0,85 | | | |
| Aluminium to recycling (kg) | kg | 2,23 | | | |
| Waste treatment of polyvinylchloride (PVC), incineration with energy recovery and fly ash extraction (kg) | kg | 1,13 | | | |
| Disposal (C4) | Unit | Value | | | |
| Landfilling of plastic mixture (kg) | kg | 1,13 | | | |
| Landfilling of ashes from incineration of Plastic mixture, process per kg ashes and residues (kg) | kg | 0,00 | | | |
| Landfilling of ashes from incineration of Non- hazardous waste, process per kg ashes and residues (kg) | kg | 0,21 | | | |
| Landfilling of aluminium (kg) | kg | 0,96 | | | |
| Landfilling of ashes from incineration of Polyvinylchloride (PVC), process per kg ashes and residues (kg) | kg | 0,18 | | | |

| Benefits and loads beyond the system boundaries (D) | Unit | Value | | |
|---|------|-------|--|--|
| Substitution of electricity (MJ) | MJ | 1,15 | | |
| Substitution of thermal energy, district heating (MJ) | МЈ | 17,42 | | |
| Substitution of primary aluminium with net scrap (kg) | kg | 1,77 | | |

LCA: Results

^{*}INA Indicator Not Assessed

^{1.} The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator

^{2.} This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

| | kg C | | | | | | | |

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

[&]quot;Reading example: 9,0 E-03 = 9,0*10-3 = 0,009" *INA Indicator Not Assessed

[&]quot;Reading example: 9,0 E-03 = 9,0*10-3 = 0,009" *INA Indicator Not Assessed

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

| Electricity mix | Source | Amount | Unit |
|--|---------------|--------|--------------|
| Electricity, renewable with guarantee of origin, low voltage, Czech Republic (kWh) - NKT | ecoinvent 3.6 | 57,10 | g CO2-eq/kWh |

Dangerous substances

The product contains no substances given by the REACH Candidate list.

Indoor environment

Additional Environmental Information

| Additional environmental impact indicators required in NPCR Part A for construction products | | | | | | | | | | | |
|--|------------------------|------------------------|----|----------|----------|----------|----------|----------|----------|-----------|--|
| Indicator | tor Unit | | A1 | A2 | A3 | A4 | A5 | B1 | B2 | В3 | |
| GWPIOBC | kg CO ₂ | kg CO ₂ -eq | | 1,18E+00 | 3,36E-01 | 6,17E-01 | 1,17E+00 | 0 | 0 | 0 | |
| Indicator | Unit | B4 | B5 | В6 | В7 | C1 | C2 | C3 | C4 | D | |
| GWPIOBC | kg CO ₂ -eq | 0 | 0 | 8,83E-02 | 0 | 0 | 3,08E-01 | 3,34E+00 | 1,92E-01 | -1,55E+01 | |

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
