Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system and has been approved by EPD Norway.

Developer of EPD: Jule Dallmann

Reviewer of company-specific input data and EPD: Alina Buchner

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Alexander Borg, Asplan Viak AS

Product description:

Floor-standing supply air and extract air unit with rotary heat recovery unit and electric air heater.

For more information see: https://www.trox.de/en/stand-alone-units/x-cube-schoolair-s-hv-f7f26076939f650a.

Product specification

Floor-standing decentralised ventilation unit. Please note: The described floor-standing ventilation unit is equipped with an integral single room control system for independent room
control. The parameters for standard control of a classroom according to our control system description are stored in the controller. Ventilation unit for schools – floor-standing – master unit. Decentralised ventilation unit TROX SCHOOLAIR-S-HV-0-EH for supply and extract air, with rotary heat recovery unit and electric air heater, for floor-standing installation.

This EPD includes the environmental data of the product series Schoolair-S.
The following represents a specific dataset of the most sold variant in the declared sales year (SAS-HV-0-EH-30-0/1200x2300x600/0-0-C3-MA-0-0-C-Z-0-2).

LCA: Calculation rules

Declared unit:

1 pcs Schoolair-S

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Energy, water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

Additional technical information:

Acoustically optimised EC fans with low specific fan power, SFP = 0 to EN 16798-3.
Rotary heat recovery unit (80% heat recovery efficiency) with moisture recovery in winter.
Electric air heater with 3000 W max. heating capacity.
Heat recovery all year round.
Reduced fine dust and pollen contamination due to integral filters that conform to VDI 6022 – filter class ISO ePM1 60% and extract air ISO coarse 90%.
Doors can be opened with an SW 10 Allen key, key holes are covered to prevent manipulation.
Easy filter change, no tools required.
Motorised shut-off dampers, normally closed (NC).
Optimised dimensions allow for integration with existing furniture.
Installation without interruption of school operations.

Optional equipment and accessories:

Modular control system FSL-CONTROL III, specially for decentralised ventilation systems.

LCA: Scenarios and additional technical information

1. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator
2. This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

*INA Indicator Not Assessed

Biogenic Carbon Content

Indicator	Unit	At the factory gate
Biogenic carbon content in product	kg C	2,41E-02
Biogenic carbon content in accompanying packaging	kg C	0,00E+00

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO2

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Source	Amount	Unit
Electricity, market mix (kWh) - Germany	ecoinvent 3.6	585,93	g CO2-eq/kWh

Dangerous substances

The product contains dangerous substances, more than 0,1% by weight, given by the REACH Candidate List, see table:

Name	CASNo	Amount
Lead	7439-92-1	> 0.1% w/w
Potassium 1,1,2,2,3,3,4,4,4-nonafluorobutane-1-sulphonate	29420-49-3	> 0.1% w/w
Lead monoxide (lead oxide)	1317-36-8	> 0.1% w/w
Lead titanium trioxide	12060-00-3	> 0.1% w/w
Diboron trioxide	1303-86-2	> 0.1% w/w

Additional Environmental Information

Additional environmental impact indicators required in NPCR Part A for construction products								
Indicator	**Unit**	A1-A3	A4	C1	C2	C3	C4	D
GWPIOBC	kg CO_2 -eq	3,22E+03	4,90E+01	4,17E-01	3,06E+00	7,38E+01	6,04E+00	-7,99E+01

GWP-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
