General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Elisabet Amat, GREENIZE projects

Product

Product description:

The Classic 7000 is an ergonomically advanced work chair designed for those who spend most of their day seated, promoting the body's natural movements. One of its standout features is the Syncroglide rocking mechanism, which allows the seat to glide slightly backward as you rock. This ensures that you maintain constant contact with the backrest, providing consistent support through all movements. This synchronized motion between the seat and backrest not only enhances comfort but also stimulates circulation and digestion in the torso, helping you stay alert and focused for longer periods.

The Classic 7000 is available with either a high, a high & wide or medium-height backrest and can be adjusted to accommodate individuals with back problems or existing back injuries, making it an ideal choice for those who require extra support during prolonged sitting.

Product specification

The model studied in this declaration is the Malmstolen Classic 7000 (7000H) including packaging. The model declared does not include any options such as armrests, headrest, etc.

The key environmental indicators for the other models of the family, and applicable options of the product collection are presented in a table on page 12 of this declaration.

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

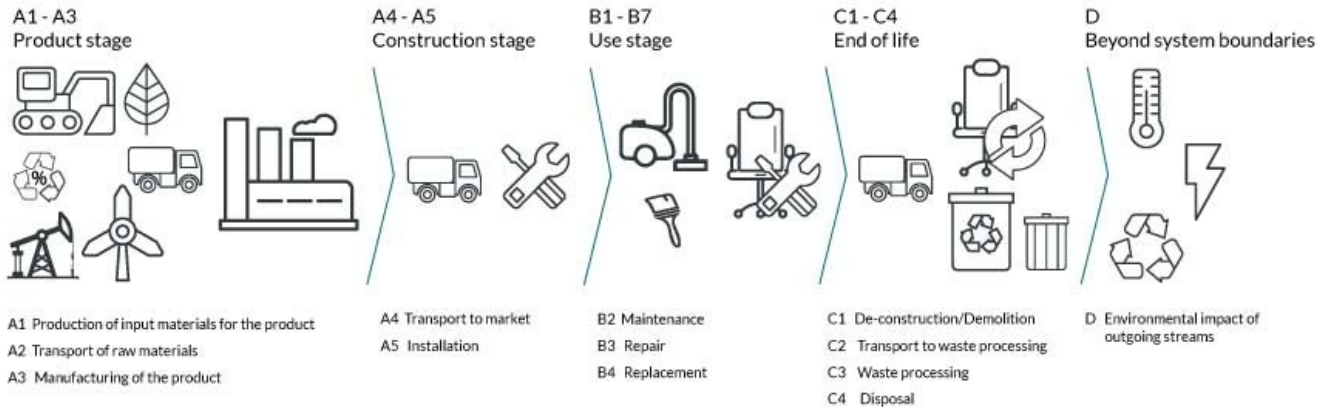

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

*INA Indicator Not Assessed

1. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator
2. This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Biogenic Carbon Content		
Indicator	Unit	At the factory gate
Biogenic carbon content in product	kg C	6,07E-01
Biogenic carbon content in accompanying packaging	kg C	1,81E+00

Note: 1 kg biogenic carbon is equivalent to 44/12 kg CO₂

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

Electricity mix	Source	Amount	Unit
Electricity, high voltage, hydro (kWh) - SE	ecoinvent 3.6	4,02	g CO ₂ -eq/kWh

Dangerous substances

The product contains no substances given by the REACH Candidate list.

GWPI-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.

Variants and Options

Key environmental indicators (A1-A3) for variants of this EPD

Variants	Weight (kg)	GWPTotal (kg CO ₂ -eq)	Total energy consumption (MJ)	Amount of recycled materials (%)
Malmstolen 7000H - Pascal by DUX seat, High back, Upholstered (Select/Gabriel), w/o accessories - No packaging	25,50	112,08	1216,30	9,42
Malmstolen 7000W - Pascal by DUX seat, High back, Upholstered (Select/Gabriel), w/o accessories - No packaging	25,99	108,48	1178,05	9,55
Malmstolen 7000M - Pascal by DUX seat, Medium back, Upholstered (Select/Gabriel), w/o accessories - No packaging	22,26	91,17	1043,80	8,89
